### **The Criminal Responsibility of Senior Political and Military Leaders as Principals to International Crimes**

Héctor Olásolo,2009-05-15 As shown by the trials of Slobodan Milosevic Charles Taylor and Saddam Hussein the large scale and systematic commission of international crimes is usually planned and set in motion by senior political and military leaders Nevertheless the application of traditional forms of criminal liability leads to the conclusion that they are mere accessories to such crimes This does not reflect their central role and often results in a punishment which is inappropriately low in view of the impact of their actions and omissions For these reasons international criminal law has placed special emphasis on the development of concepts such as control of the crime and joint criminal enterprise also known as the common purpose doctrine which aim at reflecting better the central role played by senior political and military leaders in campaigns of large scale and systematic commission of international crimes The Rome Statute of the International Criminal Court and the case law of the ICTY and the ICTR have in recent years played a unique role in the achievement of this goal

,1996-07 **Applied Psychology in Personnel Management** Wayne F. Cascio,1987 Abstract Personnel psychology as defined by the author is the application of psychological research and theory to problems of organizational human resource utilization Written for individuals with some background in personnel management and basic statistics the overall objective of the author is to help the student or professional effectively integrate psychological theory with appropriate tools and methodologies for increasing organizational effectiveness The book begins with a discussion of the pervasive nature of organizations in human society followed by an overview of the legal considerations of employment and personnel management **Scalable Big Data Analytics for Protein Bioinformatics** Dariusz Mrozek,2018-09-25 This book presents a

focus on proteins and their structures. The text describes various scalable solutions for protein structure similarity searching carried out at main representation levels and for prediction of 3D structures of proteins. Emphasis is placed on techniques that can be used to accelerate similarity searches and protein structure modeling processes. The content of the book is divided into four parts. The first part provides background information on proteins and their representation levels including a formal model of a 3D protein structure used in computational processes and a brief overview of the technologies used in the solutions presented in the book. The second part of the book discusses Cloud services that are utilized in the development of scalable and reliable cloud applications for 3D protein structure similarity searching and protein structure prediction. The third part of the book shows the utilization of scalable Big Data computational frameworks like Hadoop and Spark in massive 3D protein structure alignments and identification of intrinsically disordered regions in protein structures. The fourth part of the book focuses on finding 3D protein structure similarities accelerated with the use of GPUs and the use of multithreading and relational databases for efficient approximate searching on protein secondary structures. The book introduces advanced techniques and computational architectures that benefit from recent achievements in the field of computing and parallelism. Recent developments in computer science have allowed algorithms previously considered too time consuming to now be efficiently used for applications in bioinformatics and the life sciences. Given its depth of coverage the book will be of interest to researchers and software developers working in the fields of structural bioinformatics and biomedical databases.

**Atrial Fibrillation: Selection of Management Strategy and Evaluation of Outcomes** Rui Providencia, Serge Boveda, Teresa Strisciuglio, Alexandre Almorad,2024-09-13 Atrial fibrillation AF is an increasing arrhythmia disease its pathophysiology is the subject of many studies. Rate and rhythm control along with stroke prophylaxis are the cornerstones of AF therapy. With the recent evolution of techniques AF ablation is becoming the first therapeutic option in many centres worldwide. Pulmonary vein isolation PVI for paroxysmal AF is now well established. Additional methods are now rising with non PV trigger ablation such as drivers

posterior wall isolation epicardial ablation Recognition of physiopathological signature for AF is the next challenge for all rhythmologists This will be achieved only by collecting different inputs such as imagery and mapping This Research Topic will focus on how to define a persistent AF ablation strategy and evaluate its outcome What is the role of pre ablation imagery MRI ultrasound CT in elaborating an AF ablation strategy Could post ablation imagery be a tool to evaluate the success of an ablation Furthermore the different and complex mechanisms initiating and maintaining AF are still under investigation leading to the absence of consensus for ablation treatment What are the roles played by the new mapping tools along with their algorithms regarding the outcome of ablation The recent development of new ablation technologies catheters such as Pulse Field Ablation and Radiofrequency balloon are bringing a lot of questions regarding long term results of PVI and non PV trigger ablation    *Annual Report ,1874*    **Europa World Year** Taylor & Francis Group,2004    **The Pharmaceutical Era ,1910**    **The Literary Digest** Edward Jewitt Wheeler,Isaac Kaufman Funk,William Seaver Woods,Arthur Stimson Draper,Wilfred John Funk,1908
