Imperialism: Guided Notes

Imperialism is the extension of a **national** power over other lands.

Colonies are land occupied and operated by another nation's government.

What is Social Darwinism the attitude held by many Europeans of the time that there is a natural selection among people. Only the fit or those willing to adapt to change will survive. Europeans used this idea to justify business and in taking over other countries. This basic attitude was if you don't adapt it is too bad you were not strong enough and deserve to be conquered.

Types of Imperialism

a. **Protectorate** is a **political** unit that depends on another government for its protection.

an **Indirect Rule** means that local rulers can still maintain some power and status in the new colonial territory.

Advantages of Indirect Rule

1. **Make it easier to get what you want** because you don't have to fight with the local leaders and citizens.
2. **Make government cheaper** because they don't need to pay people from homeland to run government for them.

What is Direct Rule?

Direct Rule is when local elites or government officials were completely removed from power and replaced with a **new** set of officials brought from the ruling country. Many feared that letting the **native** have political rights would cause **revolutions** and they would try and take power away. It was also clear who was in **charge** and let the conquered power know they had no **privilege**.

Imperialism

Europe looked to **Africa** and Asia for sources of industrial **materials** and a place or market to sell the things they made in **factories**.

Imperialism in the past

Europeans looked to other countries as a way to **trade** and sell but not as a place to take over and make their **native** more powerful than the rest.
