**Ethnologia Europaea Journal of European Ethnology** Tom O'Dell,Robert Willim,2012-03-26 Ethnography has become something of a buzzword in recent years It is talked about and invoked in disciplines ranging from anthropology and ethnology to literature history business administration and design studies Textbooks that teach ethnography tend to imbue students with the impression that ethnography is a mode of systematic investigation by which the researcher gets closer to the realities of

people's everyday lives. But how straightforward are these processes in reality? As ethnography spreads into new folds of research both within and without the academy, the contributions in this volume demonstrate the manner in which field methods are adjusting, transforming or taking new forms altogether. If textbooks might lead students to believe that observations and interviews are the grounds upon which good ethnography can regularly be produced, the authors in this volume take as their point of departure the realisation that ethnography is being used in a multitude of different contexts which forces them and us as readers to question the regularities and irregularities of their own work.

Topics covered in the book include survey research, interviews, oral history, ethnography, autoethnography, evaluation, literature, visual art, health, theatre, narrative, film and a range of methods that rely on the internet and social media.

**The Practice of Qualitative Research** Sharlene Nagy Hesse-Biber, Patricia L. Leavy, 2011 This book provides undergraduate and beginning graduate students with a hands on introduction to qualitative research methods through the use of in depth examples and out of class exercises. Rather than de-linking theory from methods and presenting students with a laundry list of methods like so many texts do, *The Practice of Qualitative Research* provides readers with the link between theory and methods throughout the book. Starting with how to develop a good research question, the authors carefully show the nuts and bolts of data collection including issues of sampling, validity, reliability and ethics, the multiplicity of considerations and how to sort through them during research design, the how to's of each major qualitative approach and conclude with data analysis, interpretation and reporting. *The Practice of Qualitative Research* is designed for upper level undergraduate and graduate level courses that introduce the student to Qualitative Research. The book provides coverage on the foundations of qualitative research, the methods used in doing the research and how you analyze the data and present it.

**The Practice of Qualitative Research** Sharlene Nagy Hesse-Biber, Patricia Leavy, 2006 Covering all the key mainstream qualitative methods, this book offers candid wisdom tips from leading researchers that will help students with the process of completing a successful research project.

**The British National Bibliography** Arthur James Wells, 2009 *The Oxford Handbook of Qualitative Research* Patricia Leavy PhD, 2014-04-07 *The Oxford Handbook of Qualitative Research* presents a comprehensive overview of the field of qualitative research. It is intended for students of all levels, faculty and researchers across the social sciences. The contributors represent some of the most influential and innovative researchers in the field as well as emerging scholars. This handbook provides a broad introduction to the field of qualitative research to those with little to no background in the subject.

while simultaneously providing substantive contributions to the field that will be of interest to even the most experienced researchers. It serves as a user friendly teaching tool suitable for a range of undergraduate or graduate courses as well as individuals working on their thesis or other research projects. With a focus on methodological instruction this volume offers both a retrospective and prospective view of the field. The first two sections explore the history of the field, ethics and philosophical theoretical approaches. The next three sections focus on the major methods of qualitative practice as well as newer approaches such as arts based research and internet research area studies often excluded such as museum studies and disaster studies and mixed methods and participatory methods such as community based research. The next section covers key issues including data analysis, interpretation, writing and assessment. The final section offers a commentary about politics and research and the move towards public scholarship. คุณวิภาดา สาริกา (ดร.วิภาดา สาริกา) ผู้ทรงคุณวุฒิ
