Chapters explore the latest advances and hot topics that have emerged in recent years such as the molecular basis of endocrine and metabolic diseases, mutations, epigenetics, signaling the pathogenesis and therapy of common endocrine diseases e.g. diabetes and endocrine malignancies, new technologies in endocrine research, new methods of treatment and endocrine toxicology disruptors. Covers all aspects of endocrinology and metabolism. Incorporates perspectives from experts working within the domains of biomedicine e.g. physiology, pharmacology and toxicology, immunology, genetics and clinical sciences to provide readers with reputable multi-disciplinary content from domain experts. Provides a one stop resource for access to information as written by world leading scholars in the field with easy cross referencing of related articles to promote understanding and further research.

## Moving Towards Everlasting Artificial Intelligent Battery-Powered Implants Marvellous Moyo, Tawanda

Mushiri, 2024-10-15 Moving Towards Everlasting Artificial Intelligent Battery Powered Implants presents the development process of new artificial intelligent AI charging systems for battery powered implants that can last for a lifetime after implantation. This book introduces new strategies to address the limitations of technologies that have been employed to improve the lifespan of medical implants. This book also provides guidelines that medical implant manufacturers can adopt during their product development stages. This adds a new dimension of research on medical device implants that can be a game changer for the AI medical implants industry. Researchers, engineers, and graduate students in the fields of biomedical engineering, electrical engineering, and computer science will find this text helpful as they seek to understand the potential of AI systems to help achieve sustainability in healthcare and make current medical implants relevant in the future. Presents basic and advanced concepts in medical implants design. Explores various uses of AI and engineering concepts in optimization and enhancement of medical devices. Facilitates new approaches in improving patient safety and reliability of medical devices.
