

11 Editing Patches

The SD5 comes with 24 predefined patches that have been programmed at the factory. However, the SD5 offers many more possibilities for customizing effects in innovative ways. To discover these possibilities, we recommend that you try out the existing patches, which lets you create your own patches. The mode in which patches can be edited is called the Edit mode.

To switch from normal Play mode to Edit mode, briefly press the EDIT key. (Do not keep the EDIT key depressed, because if the key is held for 1 second, the Standby mode will be activated.)

Immediately after switching from the Play mode to the Edit mode, the parameter cursor flashes at the highest position of the DCO module, regardless of the last patch you selected. The DCO module setting of that current patch is shown on the display.

While Edit mode is active, each push of the EDIT key causes the parameter cursor to move one position down. The lower position allows patch mode to be selected. The values between parameter cursor 12345 and 12346 are stored in memory.

Parameter cursor 12346: EDIT module setting
Dual parameter cursor 12345: EDIT module: distortion type setting
Dual parameter cursor 12344: EDIT module: distortion gain setting
