Standards and Codes Guideline Saad Mahir, In the fields of work in industrial areas engineers and project implementers work to find the means to develop the work and complete it at the time indicated in an implementation plan and to avoid

delays in the progress of the project for many reasons that we cannot summarize here for its bifurcation and relationship of activities with each other but we mention the most important reason at which the failure to follow the standard specifications of activities construction of the project by engineers or technicians These standards and codes are usually mentioned in their sources in the project documents The deviation from following the standards and codes leads to technical errors and consequently to the re work and addition of unwanted time to the project activity and when errors are repeated due to non compliance with international standards this will result in an accumulation of the unwanted time in the project ultimately leads to deviating the project plan
