The Innovation Tools Handbook, Volume 2 H. James Harrington, Frank Voehl, 2016-08-19 In today's fast moving high technology environment, the focus on quality has given way to a focus on innovation. From presidents of the United States to presidents of Fortune 500 companies, it is clear that everyone thinks innovation is extremely important. The challenge is that few people stop to define why innovation is important, to understand what's driving the need for more innovation. We all agree that more frequent innovation is important, even necessary. There is actually a growing body of evidence that indicates that looking outside of your company rather than purely looking internally and to customers' needs using the tools in this Handbook will lead to more innovative ideas. Responding to customers' needs is the key to a successful business. You can use these tools to talk to customers' satisfied ones, unsatisfied ones, potential customers, people who would never buy your product or service, and also people you have never considered as a potential customer. In addition, these tools will help you ask your competitors' customers about what makes them happy with the current businesses and offerings in the industry, why they buy or do not buy from you, your competitors and other industries. These tools will help you understand the steps in the customer journey they need to take, what delights and frustrates them, and what their pain points are. The three volumes of The Innovation Tools Handbook cover 76 top rated tools and methods from the hundreds available that every innovator must master to be successful. Covering evolutionary and/or improvement innovative tools and methodologies, Volume 2 presents 23 tools and methodologies related to innovative evolutionary products, processes, and services, or the improvement of existing ones. For each tool, the book provides a definition, identifies the user of the tool, explains what phases

of the innovation process the tool is used describes how the tool is used supplies examples of the outputs from the tool identifies software that can maximize its effectiveness and includes references and suggestions for further reading Ideation is about developing ideas on how to seize identified opportunities What are the possible answers to your breakthrough questions Having a deep understanding about the customer their needs and pain points as well as the existing solutions i e business models in the industry will naturally lead to new ideas How seriously you do your discovery homework using the tools in these Handbooks will determine not only how fast you create ideas but about how likely these ideas are to succeed Tools and methodologies covered include 5 why questions Affinity diagrams attribute listing brainwriting 6 3 5 cause and effect diagrams creative problem solving model design for tools flowcharting force field analysis Kano analysis nominal group technique plan do check act reengineering redesign reverse engineering robust design SCAMPER simulations six thinking hats social networks solution analysis diagrams statistical analysis tree diagram and value analysis The authors believe that by making effective use of the tools and methodologies presented in this book your organization can increase the percentage of creative innovative ideas by five to eight times its present performance level

High-Resolution

Mass Spectroscopy for Phytochemical Analysis Sreeraj Gopi,Augustine Amalraj,Shintu Jude,2021-09-30 This new volume provides a bird's eye view of the properties, utilization and importance of high resolution mass spectrometry HRMS for phytochemical analysis. The book discusses the new and state of the art technologies related to HRMS in phytochemical analysis for the food industry in a comprehensive manner. Phytochemical characterization of plants is important in the food and nutraceutical industries and is also necessary in the procedures followed for drug development, toxicology determination, forensic studies, origin verification, quality assurance, etc. Easy determination of active compounds and isolation as well as purification of the same from natural matrices are required and the possibilities and advantages of HRMS pave the way for improved analysis patterns in phytochemistry. This book is unique in that its sole consideration is on the importance of HRMS in the field of phytochemical analysis. Along with an overview of basic instrumental information, the volume provides a detailed account of data processing and dereplication strategies. Technologies such as bioanalytical techniques and bioassays are considered also to provide support for the functions of the instruments used. In addition, a case study is presented to depict the complete phytochemical characterization of a matrix by HRMS. The book covers processing and computational techniques, dereplication, hyphenation, high resolution bioassays, bioanalytical screening, purification techniques, applications of gas chromatography, high resolution mass spectrometry, and more. Key features: Covers the fundamental instrumentation and techniques. Discusses HRMS based phytochemical research details. Focuses strictly on the phytochemical considerations. High Resolution Mass Spectroscopy for Phytochemical Analysis: State of the Art Applications and Techniques will be a valuable reference guide and resource for researchers, faculty, and students in related fields as well as those in the phytochemical industries.
