Java object or an XML document Java Message Service shows how to build applications using the point to point and publish and subscribe models how to use features like transactions and durable subscriptions to make an application reliable and how to use messaging within Enterprise JavaBeans It also introduces a new EJB type the MessageDrivenBean that is part of EJB 2.0 and discusses integration of messaging into J2EE Linux in a Nutshell Jessica Perry Hekman, 1997 Linux in a Nutshell covers the core commands available on common Linux distributions This isn't a scaled down quick reference of common commands but a complete reference containing all user programming administration and networking commands.
