Recurrent Neural Networks for Temporal Data Processing Hubert Cardot, 2011-02-09 The RNNs Recurrent Neural Networks are a general case of artificial neural networks where the connections are not feed forward ones only In RNNs connections between units form directed cycles providing an implicit internal memory Those RNNs are adapted to problems dealing with signals evolving through time Their internal memory gives them the ability to naturally take time into account Valuable approximation results have been obtained for dynamical systems *Hemodynamic Aspects of Cerebral Angiomas* Werner Hassler, 2012-12-06 Up to date the treatment of arteriovenous racemose angiomas of the brain remains unsatisfactory Intraoperative hemorrhages post embolizational or postoperative deficits depending on the site and size of the A VM as well as inoperability of rare angioma types have promoted the technical improvement of diagnostic and therapeutic approaches Nevertheless some pathophysiological problems of A VM hemodynamics have not been solved Many angiographical studies observations during embolization and operation dopplersonographical and other perfusion measurements provided some insight Sufficient animal models have yet to be developed in order to elucidate the pathophysiological mechanisms This monograph describes A V fistula models in cats and rats both conventional and newly developed which allow a better comparison with human cerebral angiomas than previous ones The most important result is that the model of the breakthrough of arterial pressure waves into the capillaries following a failure of cerebrovascular regulation cannot be confirmed Rather according to the findings in precapillary vessels presented here the regulation functions normally so that a breakdown of regulation cannot be responsible for global brain edema often seen after removal of angiomas The regulation was demonstrated using different methods most important of which being the CO response of 2 brain vessels to varying CO contents of the inhaled air Angiographical dopplersonographical and 2 perioperative dopplersonographical as well as intraoperative measurements of flow and pressure have been applied **Subject Guide to Books in Print** ,1996 **Medical and Health Care Books and Serials in Print** ,1997 **Medical Journal of Osaka**
