Adventures With A Texas Naturalist Texas Classics:

Adventures with a Texas Naturalist Roy Bedichek, 1961-01-01 Adventures with a Texas Naturalist Roy Bedichek, 1994

You may not know the little birds from the little flowers and not even care to but still you will find in *Adventures with a Texas Naturalist* a ripe mind seeing in all relationships the human significance **Environment: Why Read the Classics** Sofia Vaz, 2017-09-29

Environment Why Read the Classics presents six important essays by some of the world's leading environmental thinkers on six of the most emblematic books ever written on the environment. The books *Walden*, *A Sand County Almanac*, *Small is Beautiful*, *Silent Spring*, *The Limits to Growth*, and *Our Common Future* taken together have been hugely important in the development of global environmental awareness, activism, and policy. The essayists Viriato Soromenho Marques, J. Baird Callicott, Jos Lima Santos, Tim O'Riordan, Satish Kumar, and Marina Silva invite readers to reflect on these ground-breaking works and examine their historical importance as well as what they should mean to us today and what relevance they will have to future generations. More than just books about the environment, these are also philosophical treatises in that they increase our understanding of the natural world and of ourselves, calling us to weigh and consider as Bacon put it. In particular, they make us reflect on the need to constantly redefine the purposes of progress, the economy, and society. How we relate to nature is a crucial aspect in the plans we make as a species and as individuals, and every one of these books inspires a more respectful relationship both with nature and humanity and consequently with ourselves. The six essays in this book are the result of a series of conferences organised in Lisbon by the Calouste Gulbenkian Foundation with the support of the American Embassy in Portugal. Its raison d'être was to revisit the ideas that have shaped the environmental movement, seeking inspiration to deal with what looks like a very challenging future. The significance of such timeless concepts is now more apparent than ever, and these evergreen books are full of ideas that retain their spark even in our difficult times. This is what makes them classics.

Environment Why Read the Classics is a provocative book and will be essential reading for all those concerned about the state of the world **The Rotarian**, 1962-03

Established in 1911, *The Rotarian* is the official magazine of Rotary International and is circulated worldwide. Each issue contains feature articles, columns, and departments about or of interest to Rotarians. Seventeen Nobel Prize winners and 19 Pulitzer Prize winners from Mahatma Gandhi to Kurt Vonnegut Jr. have written for the magazine **Congressional Record** United States. Congress, 1959

Thinking Like a Planet J. Baird Callicott, 2014-01-06

Bringing together ecology, evolutionary moral psychology, and environmental ethics, J. Baird Callicott counters the narrative of blame and despair that prevails in contemporary discussions of climate ethics and offers a fresh, more optimistic approach. Whereas other environmental ethicists limit themselves to what Callicott calls Rational Individualism, in discussing the problem of climate change only to conclude that essentially there is little hope that anything will be done in the face of its perfect moral storm, in Stephen Gardiner's words, Callicott refuses to accept this view. Instead, he encourages us to look to the Earth itself and consider the

crisis on grander spatial and temporal scales as we have failed to in the past Callicott supports this theory by exploring and enhancing Aldo Leopold's faint sketch of an Earth ethic in *Some Fundamentals of Conservation in the Southwest* a seldom studied text from the early days of environmental ethics that was written in 1923 but not published until 1979 after the environmental movement gathered strength
