**Animal Behavior Desk Reference** Edward M. Barrows, 2000-12-28 Revised and updated containing over 5 000 entries with over 1 100 more entries than in the previous edition **Animal Behavior Desk Reference Second Edition A Dictionary of Behavior Ecology and Evolution** provides definitions for terms in animal behavior biogeography evolution ecology genetics psychology statistics systematics and other related sciences Formatted like a standard dictionary this reference presents definitions in a quick and easy to use style For each term where applicable you receive Multiple definitions listed chronologically Term hierarchies summarized in tables Definition sources Directives that show where a concept is defined under a synonymous name and concepts related to focal ones Non technical and obsolete definitions Pronunciations of selected terms Common denominator entries Synonyms Classifications of organisms and descriptions of many taxa Organizations related to animal behavior ecology evolution and related sciences Still the most complete work of its kind **Animal Behavior Desk Reference Second Edition A Dictionary of Behavior Ecology and Evolution** will improve your scientific communication particularly in the fields of animal behavior evolution ecology and related branches of biology If you are a teacher student writer or active in science in any way this book will prove to be one of your most valuable resources The Development of Evolutionary Genetics Prakash Gorroochurn, 2024-12-28 The book describes the historical development of evolutionary genetics starting from early ideas on evolution and ending with the modern synthesis It provides an extensive coverage of the history of both evolution and heredity and gives detailed descriptions of the works of Lamarck Darwin Mendel Nageli Weismann de Vries Galton Pearson Bateson Johannsen Morgan Fisher Wright and Haldane amongst many others The book does not deal only with a description of historical work it also analyses and critiques existing theories and evolutionary beliefs throughout history and discusses several controversies between biologists **Mimicry and Meaning: Structure and Semiotics of Biological Mimicry** Timo Maran, 2017-01-11 The present book analyses critically the tripartite mimicry model consisting of the mimic model and receiver species and develops semiotic tools for comparative analysis It is proposed that mimicry has a double structure where sign relations in communication are in constant interplay with ecological relations between species Multi constructivism and toolbox like conceptual methods are advocated for as these allow taking into account both the participants Umwelten as well as cultural meanings related to specific mimicry cases From biosemiotic viewpoint mimicry is a sign relation where deceptively similar messages are perceived interpreted and acted upon Focusing on living subjects and their communication opens up new ways to understand mimicry Such view helps to explain the diversity of mimicry as well as mimicry studies and treat these in a single framework On a meta level a semiotic view allows critical reflection on the use of mimicry concept in modern biology The author further discusses interpretations of mimicry in contemporary semiotics analyses mimicry as communicative interaction relates mimicry to iconic signs and focuses on abstract resemblances in mimicry Theoretical discussions are illustrated with detailed excursions into practical

mimicry cases in nature brood parasitism eyespots myrmecomorphy etc The book concludes with a conviction that mimicry should be treated in a broader semiotic ecological context as it presumes the existence of ecological codes and other sign conventions in the ecosystem

*Owned, An Ethological Jurisprudence of Property* Johanna Gibson, 2019-12-06 This book draws upon domestication science to undertake a radical reappraisal of the jurisprudence of property and intellectual property Bringing together animal studies and legal philosophy it articulates a critique of dominant property models and relationships from the perspective of cognitive ethology domestication science and animal behaviour In doing so a radical new picture of property emerges Focusing on the emergence of property models through prevailing ideas of human domestication and settlement the book challenges the anthropocentrism that informs standard approaches to ownership and to authorship Utilising a wide range of examples from ethology and animal studies the book thus rethinks the very nature of property as uniquely human This highly original contribution to the fields of property and intellectual property will appeal not only to legal scholars in these areas as well as in animal law but also to legal theorists and others working in the social sciences with interests in posthumanism and animal studies

*Ecoacoustics* Almo Farina, Stuart H. Gage, 2017-05-22 The sounds produced by geophonic biophonic and technophonic sources are relevant to the function of natural and human modified ecosystems Passive recording is one of the most non invasive technologies as its use avoids human intrusion during acoustic surveys and facilitates the accumulation of huge amounts of acoustical data For the first time this book collates and reviews the science behind ecoacoustics illustrating the principles methods and applications of this exciting new field Topics covered in this comprehensive volume include the assessment of biodiversity based on sounds emanating from a variety of environments the best technologies and methods necessary to investigate environmental sounds implications for climate change and urban systems the relationship between landscape ecology and ecoacoustics the conservation of soundscapes and the social value of ecoacoustics areas of potential future research An invaluable resource for scholars researchers and students *Ecoacoustics The Ecological Role of Sounds* provides an unrivalled set of ideas tools and references based on the current state of the field

*The New Walford Guide to Reference Resources* Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information saving you precious time and effort For those looking for a selective and evaluative reference resource that really delivers on its promise look no further In addition to print sources The New Walford naturally covers an extensive range of e reference sources such as digital databanks digital reference services electronic journal collections meta search engines networked information services open archives resource discovery services and websites of premier organizations in both the public and private sectors But rather than supplying a list of all available known resources as a web search engine might The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful With an emphasis on quality and sustainability the subject specialists have been careful to assess the differing ways that information

is framed and communicated in different subject areas As a result the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature This ensures that The New Walford is clear easy to use and intuitive Publisher *Animal Behavior Desk Reference* Edward M. Barrows, 2011-04-26 Words are our tools and as a minimum we should use clean tools We should know what we mean and what we do not and we must forearm ourselves against the traps that language sets us The Need for Precise Terminology Austin 1957 7 8 It follows that for effective and efficient communication people should have or at least understand the same precise terminology Such terminology is crucial for the advancement of basic theoretical and applied science yet too often there is ambiguity between scientific and common definitions and even discrepancies in the scientific literature Providing a common ground and platform for precise scientific communication in animal behavior ecology evolution and related branches of biology *Animal Behavior Desk Reference A Dictionary of Behavior Ecology and Evolution* Third Edition contains more than 800 new terms and definitions 48 new figures and thousands of additions and improvements Using a dictionary format to present definitions in a standard easily accessible manner the book's main body emphasizes conceptual terms rather than anatomical parts or taxonomic terms and focuses on nouns rather than verbs or adjectives Term hierarchies are handled with bulleted entries and terms with multiple definitions are included as superscripted entries All sources are cited and most are paraphrased to conform to uniform style and length The dictionary also includes nontechnical and obsolete terms synonyms pronunciations and notes and comments as well as etymologies term originators and related facts Appendices address organism names organizations and databases Devoted to the precise and correct use of scientific language this third edition of a bestselling standard enables students and scientists alike to communicate their findings and promote the efficient advancement of science *Complexity, Cognition, Urban Planning and Design* Juval Portugali, Egbert Stolk, 2016-05-19 This book which resulted from an intensive discourse between experts from several disciplines complexity theorists cognitive scientists philosophers urban planners and urban designers as well as a zoologist and a physiologist addresses various issues regarding cities It is a first step in responding to the challenge of generating just such a discourse based on a dilemma identified in the CTC Complexity Theories of Cities domain The latter has demonstrated that cities exhibit the properties of natural organic complex systems they are open complex and bottom up have fractal structures and are often chaotic CTC have further shown that many of the mathematical formalisms and models developed to study material and organic complex systems also apply to cities The dilemma in the current state of CTC is that cities differ from natural complex systems in that they are hybrid complex systems composed on the one hand of artifacts such as buildings roads and bridges and of natural human agents on the other This raises a plethora of new questions on the difference between the natural and the artificial the cognitive origin of human action and behavior and the role of planning and designing cities The answers to these questions cannot come from a single discipline they must instead emerge from a discourse between experts from several disciplines engaged in CTC **Feline Behavioral Health and Welfare** Ilona
