

# Methods Section

## Outline of Minimum Requirements

**Population** (For many, this section establishes your gap; in that case, contrast with populations studied in foundational literature)

- Large public high school in a suburban setting: 4,480 students attend.
- Ethnicity – Diverse
- Income – Middle-income; Title 1: 4,480 = Free Lunch 1,564 = Reduced lunch Free/Reduced = 2,376 (53%)
- Gender – Co-ed
- Grades – All?, only seniors? Etc.
- Characteristics unique to your inquiry

**Instrument(s)** Consider using a table to communicate: (1) the questions asked (output), (2) response options offered (input), and (3) source of each question (e.g. self-defined, Lankins Study 2014)

- Instrument Tables should organize questions by categories of analysis, best if you draw these categories from your academic literature. Aligns your analysis with their analysis.
- Column headings can be simple "Survey Questions", "Measurement Scale" (response options), and "Source".
- Use these categories to organize your "Findings" and "Analysis of Findings" – This approach will add continuity to your paper.
- A good table covers most of this section's communication needs. A few sentences discussing why you chose the specific sources to draw questions from.

**Sample Selection** Probably best to keep short and sweet. AP Stat students can go a little deeper but not too much detail is required here.

- Identify stratified random sample or cluster sample.
- Describe how strata or clusters were determined/defined. (e.g. strata = gate of entry for each student, Spanish classes = cluster)
- Should note that your selection method resulted in all members of the targeted population being equally likely to be chosen.
- Through this process, \_\_\_ students were identified to participate in the study.

**Implementation** (Avoid discussing sample selection here)

- Mechanical collection using student-issued Chrome Books.
- Delivery – Once a respondent was identified, an email ... (or whatever you did to communicate with them – think output from you, input from them. Use terms response(s), and respondent(s))
- Data Processing – Data analyzed with Excel data analysis toolpaks including: histogram construction, univariate and bivariate data calculations, and p-value determination.

# Method Section Of A Research Report

**Ryan J. Kettler**

## **Method Section Of A Research Report:**

**Research Methods in Psychology For Dummies** Martin Dempster,Donncha Hanna,2015-10-13 Your hands on introduction to research methods in psychology Looking for an easily accessible overview of research methods in psychology This is the book for you Whether you need to get ahead in class you're pressed for time or you just want a take on a topic that's not covered in your textbook Research Methods in Psychology For Dummies has you covered Written in plain English and packed with easy to follow instruction this friendly guide takes the intimidation out of the subject and tackles the fundamentals of psychology research in a way that makes it approachable and comprehensible no matter your background Inside you'll find expert coverage of qualitative and quantitative research methods including surveys case studies laboratory observations tests and experiments and much more Serves as an excellent supplement to course textbooks Provides a clear introduction to the scientific method Presents the methodologies and techniques used in psychology research Written by the authors of *Psychology Statistics For Dummies* If you're a first or second year psychology student and want to supplement your doorstop sized psychology textbook and boost your chances of scoring higher at exam time this hands on guide breaks down the subject into easily digestible bits and propels you towards success
