Beaufils, AEROSPATIALE TOULOUSE (France), 1991 The structural design substantiation of commercial transport airplane is provided by full static and fatigue analyses supported by testing of complete primary structures. The fatigue and damage tolerance testing on full scale specimen representative of production airplane and the teardown inspections performed at the end of the test permit to collect a lot of informations. Main objectives of fatigue tests are on one hand to early identify weak points in primary structure and to quickly define corrective actions on in service and production airplanes on the other hand to check the efficiency of the inspection methods to validate the calculation methods to justify allowable damage scratches dents and typical repairs of structural repair manual to study the propagation of artificial damages which are introduced during the test     *Government Reports Announcements & Index*, 1992     **A320** Airbus Industrie, 1987     *Technical Manual* Naval Air Systems Command, 2018-10-19 Technical Order TO 1 1A 1 is one of a series of manuals prepared to assist personnel engaged in the general maintenance and repair of military aircraft. This manual covers general aircraft structural repair. This is a Joint Service manual and some information may be directed at one branch of the service and not the other. Wherever the text of the manual refers to Air Force technical orders for supportive information refer to the comparable Navy documents see Table 1. The satisfactory performance of aircraft requires continuous attention to maintenance and repair to maintain aircraft structural integrity. Improper maintenance and repair techniques can pose an immediate and potential danger. The reliability of aircraft depends on the quality of the design as well as the workmanship used in making the repairs. It is important that maintenance and repair operations be made according to the best available techniques to eliminate or at least minimize possible failures     *Structural Repair Manual*, 1961
