*The World's Medicine Chest* Sally C. Pipes, 2025-02-04 The World's Medicine Chest details how America became the world's leader in biopharmaceutical innovation and reveals how new threats to this industry will have disastrous consequences for patients and the U.S. economy. In the 1970s Europe was the global hub for pharmaceutical innovation. European drug companies developed more than twice as many drugs in that decade as their U.S. based counterparts. But times have changed. Today nearly half of all new drugs come from the United States. Just 22 percent are of European origin. And U.S. patients get access to innovative medicines before anyone else in the world. Drawing on her decades of experience as a health policy scholar, Sally Pipes details how America became the world's leader in biopharmaceutical innovation. She argues that efforts over the last few years by Democrats and Republicans alike to impose price controls on prescription drugs will have disastrous consequences for patients and for the U.S. economy.

[COVID-19: Individual Rights and Community Responsibilities](#) J. Michael Ryan, 2023-01-31 COVID-19 Individual Rights and Community Responsibilities provides critical insights into the tensions between individual rights and community responsibilities during the COVID-19 pandemic. Questions about mandates, lockdowns, priorities, and broader questions related to neighborly responsibilities and human rights have been central to debates about how to confront the pandemic. The scholarship presented in this volume adds to those debates by confronting such issues as the role of social media in spreading misinformation, mask mandates, pandemic politics, and the very ethos of what is meant by human and individual rights. Drawing on the expertise of scholars from around the world, the work presented here represents a remarkable diversity and quality of impassioned scholarship on the impact of COVID-19 and is a timely and critical advance in knowledge related to the pandemic.

[The Price of Health](#) Michael Kinch, Lori Weiman, 2021-04-06 From pharma bros to everyday household budgets, just how did the pharmaceutical industry betray its own history and how can it return to its tradition of care? It's an unfortunate and life threatening fact: one in five Americans has skipped vital prescriptions simply because of the cost. These choices are being made even though we have reached a point in the conveyance of medical options where cancers can be cured and sight restored for those blinded by rare genetic disorders. How in this time of such advancements did we reach a point where people cannot afford the very things that could save their lives? As the COVID-19 global pandemic has pointed out, we need the leadership of scientists, researchers, public health officials, and lawmakers alike to guide us through not only in times of a global health crisis but also during far more mundane times. For the first time in decades, people from all walks of life face the same need for medicine. It is time to discuss the tough questions about drug pricing in an open, honest, and hopefully transparent manner. But first we must understand how we as a society got here. Medicines are arguably the most highly regulated and cost inflated products in the United States. The discovery, development, manufacturing, and distribution of medicines is carried out by an ever more complex and crowded set of industries, each playing a part in a larger pharmaceutical enterprise seeking to maximize profits. But this was

not always the case The Price of Health is the reveals the story of how the pharmaceutical enterprise took shape and led to the present crisis The reputation of the pharmaceutical industry is suffering from self inflicted wounds and its continued viability indeed survival is increasingly questioned Yet the drug makers do not shoulder all the blame or responsibility for the current price crisis Deeply researched The Price of Health gives us hope as to how we can still right the ship even amidst the roiling storm of a global pandemic How have medicines have been made and distributed to consumers throughout the years What sea of changes that have contributed to rising costs Some individuals actions and systems will be familiar others may surprise Yet the combined implications of these actions for will be surprising and at times shocking to both industry professionals and average Americans alike Like so much else in human history the history of the pharmaceutical enterprise is populated mostly by well intended and even noble individuals and organizations Each contributed to the formation or maintenance of structures meant to improve the quality and quantity of life through the development and distribution of medicines And yet systems originally created to do good have often been subverted in ways contrary to the motivations of their creators Only by understanding this disconnect can we better tackle the underlying problems of the industry head on preventing foreseeable and thus avoidable medical calamities to come

account of the workings of the U S government during two of the most tumultuous years in the nation s history The 107th Congress faced a time like no other in the life of the nation This was the era of the first presidential election to be decided by the United States Supreme Court the fifty fifty Senate the horror of September 11 the anthrax attacks on media and the government including Daschle s own office the war on terrorism corporate scandals that shook the economy the inexorable move toward war with Iraq and other dramatic events all leading up to the historic midterm elections of 2002 Through it all Senator Tom Daschle had with the exception of the President the most privileged view of these unfolding developments both in front of and behind the closed doors of government In Like No Other Time Daschle offers a riveting account of his singular perspective on a time when the nation faced deadly and elusive external enemies and a level of domestic political contention rarely seen in American history Senator Daschle is un flinching in his impressions of the key political figures of our time from both parties The result is an acutely perceptive assessment of how our government met and sometimes did not meet the challenges of a remarkable era As it was during the years of the 107th Congress the United States is once again at a critical and historic crossroads Our choices based on what we have learned from our recent past will affect our future in profound ways For Senator Daschle the first and perhaps most important choice lies with what kind of representation and leadership we want in government It is a choice between a political party with a core philosophical belief in the power of our collective will to confront these challenges through our government and one dominated by a group of people who don t like and don t believe in government     **The Nation** ,2009
