

DNA Extraction from Strawberry cells: "Berry Full of DNA"

Answers for the questions below may be written directly on this lab paper.

Purpose: To isolate chromosomes from strawberries via precipitation in ethanol.

Materials: Room temperature strawberries, blender/food processor, Cell Lysis Solution (CLS) (100ml pure liquid detergent, 15g NaCl, 900ml distilled water), 95% Ethanol on ice, filter paper or cheesecloth, 50 ml conical test tube with cap, spooling rod, microcentrifuge tube (MCTube, test tube rack, 15 ml test tube with cap, 65°C hot water bath.

Procedures:

- a) Blend 1 cup strawberries and 30 ml water until chunky and somewhat smooth – do not overblend. Put 7ml of mixture into test tube along with 7 ml CLS and place cap on tightly. Mix until uniform color occurs. Place in hot water bath for 20 minutes.
- b) Prepare filtration apparatus using 50 ml test tube and cheesecloth. Pour strawberry/CLS mixture through cheesecloth and filter for about 10 minutes. Extract 3 ml of filtrate using pipette. Store for procedure "e."
- c) Discard the cheesecloth and cap the test tube with filtrate.
- d) *Testing for presence of sugar:* Using a pipette extract less than 1 ml of Strawberry filtrate and add to an open-top test tube. Add an equal amount of Benedict's Solution and heat over flame. If the solution changes from blue to green, yellow, orange, or red then sugar is present.
- e) *Testing for protein:* Extract less than 1ml of Strawberry filtrate. Add to a watchglass. Look for a color change from light blue to purple. The more purple-color indicated, the more protein is present in solution.
- f) *Preparing for spooling the DNA/pouring ice cold ethanol:* Hold the 50 ml test tube at 45° angle and add ice cold ethanol to the side of the test tube to form a layer on top of the filtrate. *Be extremely careful not to agitate the ethanol/filtrate mixture.* Keep the ethanol/strawberry filtrate layers separate by keeping the flat-bottomed test tube flat on the desk at all times.
- g) *Spooling Chromosomes:* Spool the DNA using technique learned in class. Remember that chromosomes are dissolved in the strawberry solution and they precipitate as they spool around the rod in the ethanol. **Take care not to mix the ethanol/strawberry extract layers when spooling chromosomes. Collect one sample of chromosome-solution and place in MCTube (for necklace). Add two drops of BBAI to MCTube to test for presence of chromosomes.
- h) *Microscopic analysis of Chromosomes:* For microscopic analysis, use a pipette/spooling rod and place a small drop of chromosomes-in-ethanol solution from the MCTube (with BBAI) on a microscope slide and observe.

Watson,Andrew Berry,2009-01-21

Fifty years ago James D Watson then just twentyfour helped launch the greatest ongoing scientific quest of our time Now with unique authority and sweeping vision he gives us the first full account of the genetic revolution from Mendel s garden to the double helix to the sequencing of the human genome and beyond Watson s lively panoramic narrative begins with the fanciful speculations of the ancients as to why like begets like before skipping ahead to 1866 when an Austrian monk named Gregor Mendel first deduced the basic laws of inheritance But genetics as we recognize it today with its capacity both thrilling and sobering to manipulate the very essence of living things came into being only with the rise of molecular investigations culminating in the breakthrough discovery of the structure of DNA for which Watson shared a Nobel prize in 1962 In the DNA molecule s graceful curves was the key to a whole new science Having shown that the secret of life is chemical modern genetics has set mankind off on a journey unimaginable just a few decades ago Watson provides the general reader with clear explanations of molecular processes and emerging technologies He shows us how DNA continues

to alter our understanding of human origins and of our identities as groups and as individuals And with the insight of one who has remained close to every advance in research since the double helix he reveals how genetics has unleashed a wealth of possibilities to alter the human condition from genetically modified foods to genetically modified babies and transformed itself from a domain of pure research into one of big business as well It is a sometimes topsy turvy world full of great minds and great egos driven by ambitions to improve the human condition as well as to improve investment portfolios a world vividly captured in these pages Facing a future of choices and social and ethical implications of which we dare not remain uninformed we could have no better guide than James Watson who leads us with the same bravura storytelling that made The Double Helix one of the most successful books on science ever published Infused with a scientist's awe at nature's marvels and a humanist's profound sympathies DNA is destined to become the classic telling of the defining scientific saga of our age
