Christie, Billie Enz, Carol Vukelich, 2003. The unique focus of this text integrates constructivist learning, diversity, and instruction-based assessment and helps translate principles into practice. The central underlying thesis of *Teaching Language and Literacy* is that children are at the center of all good language and literacy teaching. The text with broad coverage of preschool through the elementary grades advocates an appreciation of student diversity and an implementation of assessment strategies relating to specific learning teaching events. The text describes how children construct their own knowledge about oral and written language by engaging in integrated meaningful and functional activities with other people in a variety of contexts. It then goes one step further describing how teachers can design authentic classroom reasons for using oral and written language. In keeping with the text's theme, illustrations of how teachers can work effectively with diverse learners appear throughout the text. In addition, instructionally linked assessment is another important topic central to the text. When Writers Drive the Workshop Brian Kissel, 2017. In this practical, engaging book, former elementary school teacher and university professor Brian Kissel asks teachers to go back to the roots of writing workshop. What happens when students not planned teaching points lead writing conferences? What happens when students not tests determine what they learned through reflection and self-evaluation? Writing instruction has shifted in recent years to more accountability, taking the focus away from the writer. This book explores what happens when empowered writers direct the writing workshop. Through stories from real classrooms, Brian reveals that no matter where children come from, they all have the powerful shared need to be heard. And when children choose their writing topics, their lives unfold onto the page and teachers are educated by the young voices and bold choices of these writers. Written in an engaging teacher-to-teacher style, this book focuses on four key components of writing workshop with an eye on what happens when teachers step back and allow students to drive the instruction. Conferencing sessions where students lead and teachers listen. Author's Chair where students set the agenda and ask for feedback. Reflection time and structures for students to set goals and expectations for themselves. Mini lessons that allow for detours based on students' needs, not teacher or curricular goals. Each of the chapters includes practical ideas a
