SECTION I: What is Excel?

Microsoft Excel is a spreadsheet application that is commonly used for a variety of uses. At its core, this is a table consisting of rows and columns. Excel is composed of rows and columns and stores a spreadsheet display data. Features include: calculation, graphing tools, pivot tables, and a macro programming language called Visual Basic for Applications.

What can I do with this?

The data within a table can be sorted by any column, which means that the rows can be ordered by 1 row or first name alphabetically, by the ID number ascending or descending, by the amount paid ascending or descending, or by the item. You can also filter the data in the table to have only specific values shown.

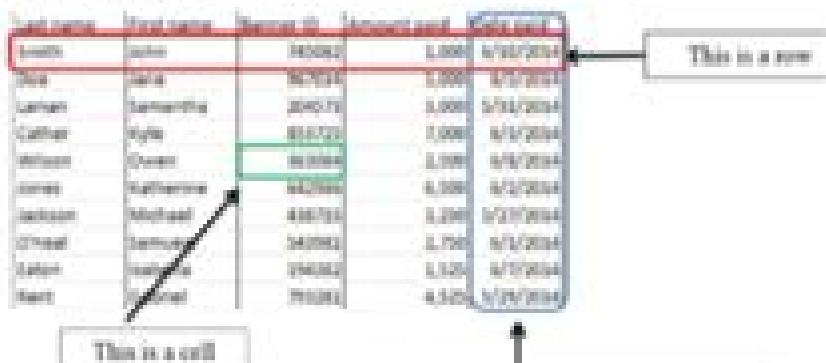

SECTION II: Cells, Rows, and Columns
