Board Accountability in Corporate Governance, 2015 Board Accountability in Corporate Governance Andrew R. Keay, 2015-06 A Research Agenda for Corporate Law Christopher M. Bruner, Marc Moore, 2023-11-03 Outlining significant dynamics that may pave the way for future evolution in the field of corporate law this timely Research Agenda explores provocative and cutting edge developments to identify new directions for scholarly inquiry Bringing together a diverse group of scholars the book evaluates doctrinal and normative issues in corporate law from a range of contextual and interdisciplinary viewpoints *Corporate Governance Codes for the 21st Century* Jean J. du Plessis, Chee Keong Low, 2017-04-19 The book is the first comprehensive consideration since the UK Cadbury Report recommended a voluntary Corporate Governance Code of the question whether Corporate Governance Codes are the most effective way of ensuring adherence to good corporate governance principles There is no doubt that the idea of voluntary compliance with good corporate governance practices based on the principle of comply or explain has captured the imagination of the world It is probably one of the best and most comprehensive examples of self regulation ever seen in any area where the society could be affected significantly for current purposes by corporations However is this the most effective way of ensuring that corporations act responsibly and adhere to good corporate governance principles Have these Codes really improved corporate governance practices significantly Is it time for a rethink and at least in certain areas start to rely more on hard law and clearer expectations to ensure compliance All these issues are addressed in the book *A Case for Shareholders' Fiduciary Duties in Common Law Asia* Ernest Lim, 2019-08-22 Reconceptualises the general meeting controlling shareholders and institutional investors as fiduciaries in four leading common law Asian jurisdictions **Parental Liability in EU Competition Law** Peter Whelan, 2023-08-10 In enforcing EU competition law the Commission employs a unique doctrine of parental antitrust liability it imposes fines on the parent company of an infringing subsidiary in cases where the parent exercises decisive influence over the subsidiary's commercial policy Critics of this contentious aspect of EU competition law believe that the doctrine is unfair ineffective obscure disproportionate contrary to due process and based upon a dubious if not extremely flimsy justificatory foundation Such criticism raises serious and unanswered questions about the legitimacy of the Commission's efforts to enforce competition law *Parental Liability in EU Competition Law A Legitimacy Focused Approach* is the first monograph to be dedicated to this controversial topic Written by Professor Peter Whelan the book contends that although the general concept of parental liability can be justified in principle the current EU level doctrine of parental antitrust liability in fact suffers from a distinct and problematic lack of legitimacy More specifically the said doctrine displays significant deficiencies with respect to effectiveness fairness and legality Given this undesirable state of affairs *Parental Liability in EU Competition Law* offers a fully rationalised reformulated approach to parental antitrust liability for EU competition law violations that is built around the notion of parental fault That approach provides a solid normative

account of how to impose parental antitrust liability in a manner that is theoretically robust effective in practice fair in substance and legally sound

The British National Bibliography Arthur James Wells, 2002

Boardroom Behaviour and the Law Selmin Hava Çalışkan, Samet Caliskan, Pereowei Subai, 2025 This book examines how various areas of law collectively influence the relationship between a company and its directors particularly in safeguarding the long term interests of stakeholders Directors inappropriate actions can expose a company to significant

corporate risks particularly in relation to regulatory violations such as breaches of competition law When directors engage in such misconduct company law and corporate governance provide certain control mechanisms that allow the company to manage these risks Additionally directors can be discouraged from engaging in such behaviour by the threat of being held accountable for violations of competition law This book evaluates various tools designed to regulate directors behaviours and ensure accountability questioning whether the legal frameworks strike the right balance between corporate liability and personal accountability It argues that these mechanisms do not sufficiently protect the long term interests of stakeholders and that shortcomings in the law leave companies vulnerable to directors misconduct which cannot be adequately addressed through traditional risk management strategies This book will be of interest to researchers in the field of corporate law competition law and corporate governance
