Body Fluid Management From Physiology To Therapy:

Body Fluid Management F.E. Agro, 2012-08-21 The administration of intravenous fluids is one of the most common and important therapeutic practices in the treatment of surgical medical and critically ill patients. The international literature accordingly contains a vast number of works on fluid management yet there is still confusion as to the best options in the various situations encountered in clinical practice. The purpose of this volume is to help the decision making process by comparing different solution properties describing their indications mechanisms of action and side effects according to physiologic body water distribution electrolytic and acid base balance and to clarify which products available on the market represent the best choice in different circumstances. The book opens by discussing in detail the concepts central to a sound understanding of abnormalities in fluid and electrolyte homeostasis and the effect of intravenous fluid administration. In the second part of the monograph these concepts are used to explain the advantages and disadvantages of solutions available on the market in different clinical settings. **Body Fluid Management From Physiology to Therapy** will serve as an invaluable decision making guide including for those who are not experts in the subject.

Postoperative Critical Care for Cardiac

Surgical Patients Ali Dabbagh, Fardad Esmailian, Sary F. Aranki, 2013-11-29 Cardiac surgical procedures are among the most common and most complicated forms of surgery worldwide and the postoperative period is characterized by complex challenges. Among the factors determining ultimate clinical outcome postoperative critical care is of major importance. This book adopts a clinical approach in explaining and analyzing the course of clinical care in patients undergoing cardiac surgery. Since the postoperative clinical status is directly influenced by preoperative and intraoperative factors the early chapters briefly examine preoperative issues and the intraoperative course of cardiac surgery with particular attention to anesthesia and the process of cardiopulmonary bypass. Subsequent chapters primarily address the critical care of patients by means of an organ oriented approach which will enable the reader to use the text as a cookbook of cardiac intensive care. This book is intended for use in daily practice by cardiac surgeons, cardiac anesthesiologists, intensivists and cardiac intensive care nurses.

Postoperative Critical Care for Adult Cardiac Surgical Patients Ali Dabbagh, Fardad Esmailian, Sary Aranki, 2018-06-04 This text reviews the postoperative management of patients who have undergone cardiac surgical procedures some of the most common and most complicated forms of surgery. These patients and their management are characterized by complex challenges while among the factors determining ultimate clinical outcome postoperative critical care is of major importance. This new and extensively updated edition of **Postoperative Critical Care for Cardiac Surgical Patients** maintains the general clinical approach in explaining and analyzing the course of clinical care in patients undergoing cardiac surgery providing the reader with a practical cookbook of postoperative intensive care in adult cardiac patients. It has been extensively updated to include the developments in this field during the last few years from new chapters on postoperative management of renal, gastrointestinal and respiratory systems postoperative management of infectious and
