Eat Delicious Nutrient Rich Muscle Meals, Save \$ and Put on Lean Muscle While in the Process

The number one reason why people fall off track and give up when incorporating a new diet to lose weight and build muscle is not making enough effort in the kitchen. This is after all where muscles are built, but it's much more complex than that. It's not only about the foods contained within your diet; it's the timing, quantity, when and why. If you're looking to shed fat while building muscle, meal timing is essential, and you'll learn all about that right here. It's a misconception that you must have a huge amount of protein in your diet and per meal, which is why bodybuilding diets can appear costly. You can lift weights day and night for hours on end; it doesn't matter if you aren't feeding your body the correct nutrients to fuel your workouts and recover afterwards; then all the effort will go to waste. Jacob Lewis is a former Personal Trainer and Dietary Advisor in the UK and has worked within the industry for over 7 years. He's passionate about helping those who wish to transform their body and shed fat, and as a former broke student himself, creating a delicious, nutrient-rich diet while on a budget has become his forte. Jacob not only breaks down when to eat certain types of food to optimise muscle gains while shedding fat; he also provides a scientific method used by many fitness trainers within the industry to calculate your exact energy needs. With a little time dedicated to this, it'll become much easier to create a diet plan with the exact amount of food required. Therefore, while on a budget, taking the time to calculate your energy needs can make all the difference to your wallet. For each recipe, there's an exact calorific breakdown which enables you to keep track of exactly what you're taking in, along with exact portions sizes of each macronutrient, complete with a step by step cooking process. Also inside is a shopping list example for your first week's shop, along with an estimated price guideline of each item. Each chapter contains a brief introduction to the importance of the type of food to consume at that time of day and why. The chapters include:

- Muscle building breakfasts
- Pre workout recipes
- Immediately after workout recipes
- Post workout recipes
- Before bed recipes
- Healthy dessert recipes
- Non training day menu
