## **Bodybuilding Drugs And Risk Health Risk And Society:**

Bodybuilding, Drugs, and Risk Lee F. Monaghan, 2001 Current popular interest in bodies fitness sport and active lifestyles has made bodybuilding more visible and acceptable within mainstream society than ever before However the association between bodybuilding drugs and risk has contributed to a negative image of an activity which many people find puzzling Using data obtained from participant observation and interviews this book explores bodybuilding subculture from the perspective of the bodybuilder It looks at How bodybuilders try to maintain competent social identities How they manage the risks of using steroids and other physique enhancing drugs How they understand the alleged steroid violence link How they see the muscular body Through systematic exploration it becomes apparent that previous attempts to explain bodybuilding in terms of masculinity in crisis or gender insecurity are open to question Different and valuable insights into what sustains and legitimizes potentially dangerous drug taking activities are provided by this detailed picture of a huge underground subculture

Doping in Sport and Fitness April Henning, Jesper Andreasson, 2022-12-12 Doping in Sport and Fitness argues that rigid differentiations between doping contexts are less clear than it might seem Breaking down these boundaries allows for a more complete understanding of substance use patterns behaviours and policy responses related to sport fitness and society

Online Doping Jesper Andreasson, April Henning, 2023-06-29 This book examines the bodies communities and cultures that evolve in different online doping spaces By engaging in critical analysis of the interrelatedness of online and offline doped realities the book provides a comprehensive analysis influenced by digital sociology and feminist theory It focuses on the intersection of doping bodies and technology and is structured around three interconnected themes prominent in doping research but less acknowledged in online environments doping spaces and communities gender and power relationships and the relationship between online activities and offline social life Building on extensive online research with different drug communities and doping spaces the authors illustrate how the online world of doping has developed into a digital ecosystem and present an argument for understanding doping as a cyborgified concept It

Female drug addicts are often stereotyped either as promiscuous lazy and selfish or as weak scared and trapped into addiction These depictions typify the pathology and powerlessness narrative that has historically characterized popular and academic conversations about female substance abusers Neither Villain Nor Victim attempts to correct these polarizing perspectives by presenting a critical feminist analysis of the drug world By shifting the discussion to one centered on women s agency and empowerment this book reveals the complex experiences and social relationships of women addicts Essays explore a range of topics including the many ways that women negotiate the illicit drug world how former drug addicts manage the more intimate aspects of their lives as they try to achieve abstinence how women tend to use intervention resources more positively than their male counterparts and how society can improve its response to female substance abusers by moving away from social controls such as the criminalization of prostitution and rehabilitative programs that have been shown to fail women in the long term Advancing important new perspectives about the position of women in the drug world this book is essential reading in courses on women and crime feminist theory and criminal justice      *Reflexions in the Flesh* Nick Crossley,2006-09 In this book Nick Crossley explores the concept of reflexive embodiment how we as embodied beings reflect upon our own embodiment He considers the ways in which we modify and maintain our bodies from brushing our teeth and washing our faces through to tattooing and bodybuilding Some forms of body work are demanded by social conventions others represent legitimate choices and others still deviate from or resist the norm He argues that a proper understanding of reflexive embodiment must be alert to these differences and that we must appreciate that our bodies are not passive or inert substances that we can mould as we like They change in ways that we do not intend and of which we are not aware and they may prove difficult to change in the ways we do intend Many theorists in sociology offer perspectives on the link between society and body modification mostly focused in one way or another upon modernity      Journal of Sports Medicine and Physical Fitness ,1998      *Journal of the Royal Society of Medicine* Royal Society of Medicine (Great Britain),2006 Includes selected papers from meetings of the Society and of its sections
