Bodyembodiment Symbolic Interaction And The Sociology Of The Body:

Body/Embodiment Phillip Vannini, 2016-04-08 The body and experiences of embodiment have generated a rich and diverse sociological literature. This volume articulates and illustrates one major approach to the sociology of the body: symbolic interactionism, an increasingly prevalent theoretical base of contemporary sociology derived from the pragmatism of writers such as John Dewey, William James, Charles Peirce, Charles Cooley and George Herbert Mead. The authors argue that from an interactionist perspective the body is much more than a tangible corporeal object; it is a vessel of great significance to the individual and society. From this perspective body, self and social interaction are intimately interrelated and constantly reconfigured. The collection constitutes a unique anthology of empirical research on the body from health and illness to sexuality, from beauty and imagery to bodily performance in sport and art and from mediated communication to plastic surgery. The contributions are informed by innovative interactionist theory, offering fresh insights into one of the fastest growing sub-disciplines of sociology and cultural studies. *Body/embodiment* Dennis D. Rorty and the Problem of Postmodern Experience Tobias Timm, 2019-07-05 Richard Rorty, perhaps the most important philosopher of the past century, refused to write meaningfully about experience due to his postmodern inclination to associate experience with a belief in objectivity and foundational truths. **Richard Rorty and the Problem of Postmodern Experience: A Reconstruction** explores the context, reasoning and consequences of this resistance. While for much of our history, experience was valued for its potential to teach us about the world, Rorty and his fellow postmodern thinkers encouraged us to doubt the narrative that we can use experience to make epistemological progress. Rather than pursue universal truths about the world, Rorty suggested that we recognize all of our beliefs about the world as being social constructions. In his project to recover a concept of experience from within the framework, Rorty has constructed Tobias Timm describes how classical pragmatist theories of experience are naïve about the problem of foundationalism. He also explains how the most common phenomenological work lacks an active subject: experience here is simply something that happens to us rather than something we actively seek to improve. Timm demonstrates that despite Rorty's insistence that we talk about language instead of experience, there are strong experiential elements in his work. Rorty's romanticism and his optimism about the accomplishments of western culture are remedial to the pessimism of postmodern discussions about experience.
