# Bodystories A Guide To Experiential Anatomy

**Julia Schneider**

## **Bodystories A Guide To Experiential Anatomy:**

BodyStories Andrea Olsen, 2020-02-04 BodyStories is a book that engages the general reader as well as the serious student of anatomy. Thirty one days of learning sessions heighten awareness about each bone and body system and provide self guided studies. The book draws on Ms Olsen's thirty years as a dancer and teacher of anatomy to show how our attitudes and approaches to our body affect us day to day. Amusing and insightful personal stories enliven the text and provide ways of working with the body for efficiency and for healing. BodyStories is used as a primary text in college dance departments, massage schools and yoga training programs internationally.

**Bodystories**, 2004 **Body and Earth** Andrea Olsen, 2020-02-04 Body is our first environment writes Andrea Olsen. It is the medium through which we know the earth. In a remarkable integration of environmental science, biology, meditation and creative expression, Olsen, a dancer who teaches in the environmental studies program at Middlebury College, offers a guide to a holistic understanding of person and place. Part workbook, part exploration, **Body and Earth** considers the question of how we can best most responsibly inhabit both our bodies and our planet. Olsen displays an easy command of fields as diverse as geology, biochemistry, ecology and anatomy as she explores the ways in which our bodies are derived from and connected to the natural world. But **Body and Earth** is not just a lesson; it is also an investigation. Arranged as a 31 day program, the book offers not only a wealth of scientific information but also exercises for both exploring the body and connecting with place, illustrations and works of art that illuminate each chapter's themes and Olsen's own meditations and reflections connecting the topics to her personal history and experience. Olsen insists that neither body nor landscape are separate from our fundamental selves but in a culture which views the body as a mechanism to be trained and the landscape as a resource to be exploited, we need to learn to see again their fundamental wholeness and interconnection. Through hard data, reflection exercises and inspiration, **Body and Earth** offers a guide to responsible stewardship of both our planet and our persons.
