BELLWORK: Anne was a courageous spoken witness who lived in America during the 1700s. She was a devout Puritan who led the religious controversies of New England in the 1690s of spiritual revivals. Anne's convictions of religious truths, and her Bible studies, lead her to write from the Massachusetts Colony in 1693, she then settled in New England, where she continued to be an important figure. Anne's biography is a good one for independent study, and a right example to imitate.

The Digital Sublime Vincent Mosco,2005-09-23 Interpreting the myths of the digital age why we believed in the power of cyberspace to open up a new world The digital era promises as did many other technological developments before it the transformation of society with the computer we can transcend time space and politics as usual In The Digital Sublime Vincent Mosco goes beyond the usual stories of technological breakthrough and economic meltdown to explore the myths constructed around the new digital technology and why we feel compelled to believe in them He tells us that what kept enthusiastic investors in the dotcom era bidding up stocks even after the crash had begun was not willful ignorance of the laws of economics but belief in the myth that cyberspace was opening up a new world Myths are not just falsehoods that can be disproved Mosco points out but stories that lift us out of the banality of everyday life into the possibility of the sublime He argues that if we take what we know about cyberspace and situate it within what we know about culture specifically the central post Cold War myths of the end of history geography and politics we will add to our knowledge about the digital world we need to see it with both eyes that is to understand it both culturally and materially After examining the myths of cyberspace and going back in history to look at the similar mythic pronouncements prompted by past technological advances the telephone the radio and television among others Mosco takes us to Ground Zero In the final chapter he considers the twin towers of the World Trade Center our icons of communication information and trade and their part in the politics economics and myths of cyberspace
