

AutoPLANT® Piping V8i (SELECTseries 4)

AutoCAD-based Piping Design and Modeling

AutoPLANT® Piping V8i is a spec-driven, advanced 3D piping design and modeling application. It is easy to use and customize, providing interactive routing and placement in an intelligent 3D environment.

Feature-rich 2D drawings in single and double line with visible annotations

3D Modeling Enhances Quality

AutoPLANT Piping V8i represents intelligent plant components in 3D models. Components and viewing controlled data are dynamically linked to a shared project database, which can be used to modify and reuse the component data or generate project reports.

Specification Driven Ensures Design Compliance

AutoPLANT Piping V8i ensures compliance by ensuring compliance with design criteria. Components placed in a design mode are intelligent parametric objects. AutoPLANT Piping includes hundreds of templates representing industry standards (ANSI, ASME, and ASME) or manufacturer specific components (such as Crane and Laidlo).

Piping Design for Multiple Industries

AutoPLANT Piping supports a variety of pipe designs for different industries through modules for ductile iron, high purity, plastic, steel, and stainless components and is the first piping design software to support asbestos pipes. Additional modules support P&ID, isometrics, and instrumentation for more robust plant design.

Flexible Operation Automates Tasks

Component placement is intuitive and consistent, much like tasks are automated. Whether placing adjacent piping and components in a completed plant area or routing over large areas, automatic placement and orientation maximizes productivity.

The AutoPLANT suite has always been easy to administer and operate. Project Administrators and other tools share the creation and configuration of your project very early and fast.

AutoPLANT and Bentley Navigator Speed Design While Improving Results

Bentley Navigator supports a tightly integrated project workflow. The ability to distribute early 3D models to multiple stakeholders, have those team members dynamically mark-up with changes, etc., and feed that information back to the designer in an accurate and timely manner is critical to project success. Because Bentley's models are intelligent, all log information is shared between the two applications, so Bentley Navigator users can extend a completed and use all details the designer has defined. Reviewers can use Bentley Navigator to mark up a model and send comments directly back to the designer to review in AutoPLANT Piping – providing an extra level of design review and an increase in project speed and accuracy.

An Applied Guide to Process and Plant Design Sean Moran, 2019-06-12 An Applied Guide to Process and Plant Design 2nd edition is a guide to process plant design for both students and professional engineers. The book covers plant layout and the use of spreadsheet programs and key drawings produced by professional engineers as aids to design subjects that are usually learned on the job rather than in education. You will learn how to produce smarter plant design through the use of computer tools including Excel and AutoCAD. What If Analysis statistical tools and Visual Basic for more complex problems. The book also includes a wealth of selection tables covering the key aspects of professional plant design which engineering students and early career engineers tend to find most challenging. Professor Moran draws on over 20 years experience in process design to create an essential foundational book ideal for those who are new to process design compliant with both professional practice and the IChemE degree accreditation guidelines. Includes new and expanded content including illustrative case studies and practical examples. Explains how to deliver a process design that meets both business and safety criteria. Covers plant layout and the use of spreadsheet programs and key drawings as aids to design. Includes a comprehensive set of selection tables covering aspects of professional plant design which early career designers find most challenging.

The Planning Guide to Piping Design Richard Beale, Paul Bowers, 2017-10-22 The Planning Guide to Piping Design Second Edition covers the entire process of managing and executing project piping designs from conceptual to mechanical completion also explaining what roles and responsibilities are required of the piping lead during the process. The book explains proven piping design methods in step by step processes that cover the increasing use of new technologies and software. Extended coverage is provided for the piping lead to manage piping design activities which include supervising planning scheduling evaluating manpower monitoring progress and communicating the piping design. With newly revised chapters and the addition of a chapter on CAD software the book provides the mentorship for piping leads engineers and designers to grasp the requirements of piping supervision in the modern age. Provides essential standards specifications and checklists and their importance in the initial set up phase of piping project s execution. Explains and provides real world examples of key procedures that the piping lead can use to monitor progress. Describes project deliverables for both small and complex size projects. Offers newly revised chapters including a new chapter on CAD software.

Instrument Engineers' Handbook, Volume Three Bela G. Liptak, 2002-06-26 Instrument Engineers Handbook Third Edition Volume Three Process Software and Digital Networks provides an in depth state of the art review of existing and evolving digital communications and control systems.
