Whiteside, 2002-06-06 Essential reading for social and medical scientists and all those interested in infectious diseases and public health AIDS and the Twenty First Century examines the social and economic origins and impacts of the HIV AIDS epidemic HIV AIDS is not only a medical problem It is an indication of the scale of the global crisis in public health Accessibly written this book is necessary reading for policymakers students and all those who are concerned about the relationship between poverty inequality and infectious diseases **AIDS in the Twenty-first Century** Tony Barnett, 2002 ***Africa and the New Globalization*** George Klay Kieh, 2008 This book focuses on the new globalization the most expansive and technologically advanced of all the phases of globalization It identifies and discusses many of the frontier issues in Africa that are being impacted by the dynamics of this new globalization debt human rights development state sovereignty the environment and the HIV AIDS pandemic **Trends in Twenty-First-Century African Theatre and Performance** Kene Igweonu, 2011 Trends in Twenty First Century African Theatre and Performance is a collection of regionally focused articles on African theatre and performance The volume provides a broad exploration of the current state of African theatre and performance and considers the directions they are taking in the 21st Century It contains sections on current trends in theatre and performance studies on applied community theatre and on playwrights The chapters have evolved out of a working group process in which papers were submitted to peer group scrutiny over a period of four years at four international conferences The book will be particularly useful as a key text for undergraduate and postgraduate courses in non western theatre and performance where this includes African theatre and performance and would be a very useful resource for theatre scholars and anyone interested in African performance forms and cultures

The Millennium Development Goals: Challenges, Prospects and Opportunities Nana #N/A, 2017-07-05 As the 15 year Millennium Development Goals approach their conclusion we can now measure their larger successes and failures in more than snapshot fashion and we can begin to consider how best to shape the international development agenda for the coming decades based on what we have learned But the performance and outlook for the MDGs can neither be reduced to the sum of its eight goals nor be divorced from international dynamics the hard interests of states and other actors and the global dynamics that impact on both For that reason this volume balances contextual analysis the role of formative and constraining forces the importance of normative considerations and illuminating case studies to deliver a study of the MDGs which has depth and nuance as well as breadth Poised between judging the recent performance and the future promise of the MDGs this book is substantial provocative and timely This book was published as a special issue of Third World Quarterly

Epidemics Sarah Dry, Melissa Leach, 2010 Recent disease events such as SARS H1N1 and avian influenza and haemorrhagic fevers have focussed policy and public concern as never before on epidemics and so called emerging infectious diseases Understanding and responding to these often unpredictable events have become major challenges for local national

and international bodies All too often responses can become restricted by implicit assumptions about who or what is to blame that may not capture the dynamics and uncertainties at play in the multi scale interactions of people animals and microbes As a result policies intended to forestall epidemics may fail and may even further threaten health livelihoods and human rights The book takes a unique approach by focusing on how different policy makers scientists and local populations construct alternative narratives accounts of the causes and appropriate responses to outbreaks about epidemics at the global national and local level The contrast between emergency oriented top down responses to what are perceived as potentially global outbreaks and longer term approaches to diseases such as AIDS which may now be considered endemic is highlighted Case studies on avian influenza SARS obesity H1N1 influenza HIV AIDS tuberculosis and haemorrhagic fevers cover a broad historical geographical and biological range As this book explores it is often the most vulnerable members of a population the poor the social excluded and the already ill who are likely to suffer most from epidemic diseases At the same time they may be less likely to benefit from responses that may be designed from a global perspective that neglects social ecological and political conditions on the ground This book aims to bring the focus back to these marginal populations to reveal the often unintended consequences of current policy responses to epidemics Important implications emerge for how epidemics are thought about and represented for how surveillance and response is designed and for whose knowledge and perspectives should be included Published in association with the Economic and Social Research Council ESRC Global Health Governance Sophie Harman, 2012-03-15 In the light of scares about potential pandemics such as swine fever and avian flu the issue of global health and its governance is of increasing concern to scholars and practitioners of medicine public health social work and international politics alike Providing a concise and informative introduction to how global health is governed this book Explores the various ways in which we understand global health governance Explains the nuts and bolts of the traditional institutions of global health governance highlights key frameworks and treaties and their relative successes and failings Examines the actors in global health governance their purpose influence and impact Offers an in depth analysis of the effectiveness of global health interventions focusing particularly on HIV AIDS tuberculosis and malaria Highlighting the wide variety of actors issues and approaches involved this work shows the complex nature of global health governance forcing the reader to examine who or what really governs global health to what outcome and for whom Journal of Comparative Family Studies , 2008 **Targeting Agricultural Research for Development in the Semi-arid Tropics of Sub-Saharan Africa** H. Ade Freeman, 2002 **Ufahamu** , 2006 Moving Health Sovereignty in Africa Andrew F. Cooper, Hany Besada, 2016-04-15 Today's era of intense globalization has unleashed dynamic movements of people pathogens and pests that overwhelm the static territorial jurisdictions on which the governance provided by sovereign states and their formal intergovernmental institutions is based This world of movement calls for new ideas and institutions to govern people's health above all in Africa where the movements and health challenges are the most acute This book insightfully explores

these challenges in ways that put the perspectives of Africans themselves at centre stage It begins with the long central and still compelling African health challenge of combating the pandemic of HIV AIDS It then examines the global governance responses by the major multilateral organizations of the World Bank and the World Trade Organization and the newer informal flexible democratically oriented ones of the Group of Eight It also addresses the compounding health challenge created by climate change to assess both its intensifying impact on Africa and how all international institutions have largely failed to link climate and health in their governance response It concludes with several recommendations about the innovative ideas and institutions that offer a way to closing the great global governance gaps and thus improving Africans health and that of citizens beyond

Diasporic Avant-Gardes Carrie Noland,Barrett Watten,2009-08-15 Diasporic Avant Gardes draws into dialogue two differing traditions of poetic practice the diasporic and the avant garde This interdisciplinary collection examines the unacknowledged affinities and crucial differences between avant garde and diasporic formal strategies and social formations The essays foreground the creation of experimental forms and investigate the specific contexts of cultural displacement and language use that inform their poetics

Navigating Youth, Generating Adulthood Catrine Shroff,Catrine Christiansen,Mats Utas,Henrik Vigh,2006 This book focuses on the lives and experiences of young people in Africa On agents who willingly or unwillingly see themselves as belonging to the socio generational category of youth and the ways in which they seek to shape and unfold their lives in a positive manner Rather than seeing youth as either a social or cultural entity in itself or as a predefined life stage the book argues for an exploration of how youth position themselves and are positioned within generational categories In studying young people social scientists must conceptualise youth as both social being and social becoming a position in movement It is from the duality of being positioned and seeking one __s own socio generational position that this book engages in the debate on contemporary African youth The chapters are based on ethnographic research across the African continent and provide in depth analyses of the perceptions positions possibilities and practices of diverse groups of young people The book will be of value to scholars and students of African studies and social science interested in this major yet marginalized social category in contemporary Africa

The African Economy and Its Role in the World Economy Arne Bigsten,Dick Durevall,2008 In a broad survey this issue of Current African Issues presents a multifaceted picture of the current state of the African economy and the effect globalization has had on economic growth and economic policies
