Religious and Non-Religious Perspectives on Happiness and Wellbeing Sharada Sugirtharajah, 2022-04-25 This book explores the theme of happiness and well-being from religious, spiritual, philosophical, psychological, humanistic, and health perspectives. Taking a non-binary approach, it considers how happiness, in particular, has been understood and appropriated in religious and non-religious strands of thought. The chapters offer incisive insight from a variety of perspectives, including humanism, atheism, and major religions such as Christianity, Islam, Buddhism, Hinduism, and Judaism. Together, they demonstrate that although worldviews might vary substantially, there are concurrences across religious and non-religious perspectives on happiness that provide a common ground for further cross-cultural and interreligious exploration. What the book makes clear is that happiness is not a static or monolithic category. It is an ongoing process of being and becoming, striving and seeking, living ethically and meaningfully, as well as arriving at a tranquil state of being. This multifaceted volume makes a fresh contribution to the contemporary study of happiness and is valuable reading for scholars and students from religious studies and theology, including those interested in interreligious dialogue and the psychology of religion, as well as positive psychology.
