Library of Congress. Copyright Office, 1968 [Stardom](#) Christine Gledhill, 1991 In the past stars have been studied as cogs in a mass entertainment industry selling desires and ideologies. But since the 1970s new approaches have reopened debate as film and cultural studies try to account for the active role of the star in producing meanings, pleasures, and identities for a diversity of audiences. Stardom brings together for the first time some of the major writing of the last decade which seeks to understand the phenomenon of stars and stardom. Gathered under four headings: The System, Stars and Society, Performers and Signs, Desire and Politics, these essays represent a range of approaches drawn from film history, sociology, textual analysis, audience research, psychoanalysis, and cultural politics. They raise important issues about the politics of representation and the cultural limitations and possibilities of stars.

[American Classical Review](#), 1973 [Sensitive Pasts](#) Carla van Boxtel, Maria Grever, Stephan Klein, 2016-12-01 Heritage as an area of research and learning often deals with difficult historical questions due to the strong emotions and political commitments that are often at stake. In this, it poses particular challenges for teachers, museum educators, and the publics they serve. Guided by a shared focus on these sensitive pasts, the contributors to this volume draw on new theoretical and empirical research to provide valuable insights into heritage pedagogy. Together, they demonstrate the potential of heritage as a historical educational domain that transcends myopic patriotism, parochialism, and simplistic relativism, helping to enhance critical and sophisticated historical thinking.
