Accelerator Physics Mario Conte,2012 *Accelerator Physics: Example Problems With Solutions* Mario Conte,William W Mackay,2012-03-23 This manual provides solutions to the problems given in the second edition of the textbook entitled An Introduction to the Physics of Particle Accelerators Simple to solve problems play a useful role as a first check of the student s level of knowledge whereas difficult problems will test the student s capacity of finding the bearing of the problems in an interdisciplinary environment The solutions to several problems will require strong engagement of the student not only in accelerator physics but also in more general physical subjects such as the profound approach to classical mechanics discussed in Chapter 3 and the subtleties of spin dynamics Chapter 13

Numerical Methods in Computational Electrodynamics Ursula van Rienen,2012-12-06 treated in more detail They are just specimen of larger classes of schemes Es sentially we have to distinguish between semi analytical methods discretiza tion methods and lumped circuit models The semi analytical methods and the discretization methods start directly from Maxwell s equations Semi analytical methods are concentrated on the analytical level They use a computer only to evaluate expressions and to solve resulting linear algebraic problems The best known semi analytical methods are the mode matching method which is described in subsection 2 1 the method of integral equations and the method of moments In the method of integral equations the given boundary value problem is transformed into an integral equation with the aid of a suitable Greens function In the method of moments which includes the mode matching method as a special case the solution function is represented by a linear combination of appropriately weighted basis func tions The treatment of complex geometrical structures is very difficult for these methods or only possible after geometric simplifications In the method of integral equations the Greens function has to satisfy the boundary condi tions In the mode matching method it must be possible to decompose the domain into subdomains in which the problem can be solved analytically thus allowing to find the basis functions Nevertheless there are some ap plications for which the semi analytic methods are the best suited solution methods For example an application from accelerator physics used the mode matching technique see subsection 5 4
