**Transplant International Official Journal of the European Society for Organ Transplantation** G. Opelz, W.A. Buurman, J.P. van Hooff, P. MacMaster, J. Wallwork, 2013-11-11 This supplement to Transplant International contains the Proceedings of the successful 5th Congress of the European Society for Organ Transplantation held in Maastricht from 7-10 October 1991. Of 827 abstracts submitted to the congress 548 were selected by the Scientific Committee for either oral or poster presentation. Of these 548 presentations the guest editors selected 212 full papers for publication in this book. Two aspects are important where proceedings are concerned: the quality of the papers and the speed of publication. I thank our authors and guest editors whose combined expertise has given us a guarantee of quality. I also thank our editorial and production teams for their tremendous efforts to hasten editing, proofreading, printing and publication. In particular, I would like to express my gratitude to Maurits Booster M.D. and Sylvia van Roosmalen for their assistance and support in seeing this supplement through to completion. As a concession to time, we have waived some of our stringent rules of style and limited our correspondence with authors by, for example, page proofs being reviewed and corrected in-house only. This enables us to publish two months earlier but has the disadvantage that given the allotted time we have not been able to ensure that each and every article has an abstract nor that every item has been dotted in the reference lists or in the addresses/institute affiliations of all the authors.

**C D A Journal** California Dental Association, 1999-07 **The Author's Guide to Biomedical Journals**, 1994 *Streptococcus Pneumoniae* Alexander Tomasz, 2000. Based on a workshop titled *Streptococcus pneumoniae: Molecular Biology and Mechanisms of Disease Update* for the 1990s held in September 1996 in Oeiras, Portugal, this volume contains some 40 contributions written by some 50 biochemists, molecular microbiologists, geneticists, zoologists, pharmacologists and pediatricians from 12 countries. Contributions are divided into six sections: an introductory segment addressing work to be done in the field; the disease's functional anatomy; the disease's chromosome structure; recombination and cloning; capsule, cell wall and virulence factors; pneumococcal disease and animal models; antibiotic resistance and surveillance and intervention.
