To Die For Cecilia Elizabeth O'Leary, 2018-06-05 July Fourth The Star Spangled Banner Memorial Day and the pledge of allegiance are typically thought of as timeless and consensual representations of a national American culture In fact as Cecilia O Leary shows most trappings of the nation s icons were modern inventions that were deeply and bitterly contested While the Civil War determined the survival of the Union what it meant to be a loyal American remained an open question as the struggle to make a nation moved off of the battlefields and into cultural and political terrain Drawing upon a wide variety of original sources O Leary s interdisciplinary study explores the conflict over what events and icons would be inscribed into national memory what traditions would be invented to establish continuity with a suitable past who would be exemplified as national heroes and whether ethnic regional and other identities could coexist with loyalty to the nation This book traces the origins development and consolidation of patriotic cultures in the United

States from the latter half of the nineteenth century up to World War I a period in which the country emerged as a modern nation state Until patriotism became a government dominated affair in the twentieth century culture wars raged throughout civil society over who had the authority to speak for the nation Black Americans women s organizations workers immigrants and activists all spoke out and deeply influenced America s public life Not until World War I when the government joined forces with right wing organizations and vigilante groups did a racially exclusive culturally conformist militaristic patriotism finally triumph albeit temporarily over more progressive egalitarian visions As O Leary suggests the paradox of American patriotism remains with us Are nationalism and democratic forms of citizenship compatible What binds a nation so divided by regions languages ethnicity racism gender and class The most thought provoking question of this complex book is Who gets to claim the American flag and determine the meanings of the republic for which it stands *American memories [by J.*

Nationalism and African

Intellectuals Toyin Falola, 2004 An examination of the attempt by Western educated African intellectuals to create a better Africa through connecting nationalism to knowledge from the anti colonial movement to the present day This book is about how African intellectuals influenced primarily by nationalism have addressed the inter related issues of power identity politics self assertion and autonomy for themselves and their continent from the mid nineteenth century onward Their major goal was to create a better Africa by connecting nationalism to knowledge The results have been mixed from the glorious euphoria of the success of anti colonial movements to the depressing circumstances of the African condition as we enter a new millennium As the intellectual elite is a creation of the Western formal school system the ideas it generated are also connected to the larger world of scholarship This world is in turn shaped by European contacts with Africa from the fifteenth century onward the politics of the Cold War and the subsequent collapse of the Soviet Union In essence Africa and its elite cannot be fully understood without also considering the West and changing global politics Neither can the academic and media contributions by non Africans be ignored as these also affect the ways that Africans think about themselves and their continent *Nationalism and African Intellectuals* examines intellectuals ambivalent relationships with the colonial apparatus and subsequent nation state formations the contradictions manifested within pan Africanism and nationalism and the relation of academic institutions and intellectual production to the state during the nationalism period and beyond Toyin Falola is the Jacob and Frances Sanger Mossiker Chair in the Humanities and University Distinguished Teaching Professor at the University of Texas at Austin
