Glencoe Algebra 1, 2001 **The Journal of the Bombay Natural History Society** Bombay Natural History Society, 1921 **Tools of American Mathematics Teaching, 1800-2000** Peggy Aldrich Kidwell, Amy Ackerberg-Hastings, David Lindsay Roberts, 2008-08-11 From the blackboard to the graphing calculator the tools developed to teach mathematics in America have a rich history shaped by educational reform, technological innovation, and spirited entrepreneurship. In *Tools of American Mathematics Teaching 1800-2000* Peggy Aldrich Kidwell, Amy Ackerberg-Hastings, and David Lindsay Roberts present the first systematic historical study of the objects used in the American mathematics classroom. They discuss broad tools of presentation and pedagogy not only blackboards and textbooks but early twentieth century standardized tests, teaching machines, and the overhead projector. Tools for calculation and tools for representation and measurement. Engaging and accessible this volume tells the stories of how specific objects such as protractors, geometric models, slide rules, electronic calculators, and computers came to be used in classrooms and how some disappeared. **In the Field, Among the Feathered**

Thomas R. Dunlap, 2011-12-01 America is a nation of ardent knowledgeable birdwatchers. But how did it become so? And what role did the field guide play in our passion for spotting, watching, and describing birds? *In the Field Among the Feathered* tells the history of field guides to birds in America from the Victorian era to the present, relating changes in the guides to shifts in science, the craft of field identification, and new technologies for the mass reproduction of images. Drawing on his experience as a passionate birder and on a wealth of archival research, Thomas Dunlap shows how the twin pursuits of recreation and conservation have inspired birders and how field guides have served as the preferred method of informal education about nature for well over a century. The book begins with the first generation of late 19th century birdwatchers who built the hobby when opera glasses were often the best available optics and bird identification was sketchy at best. As America became increasingly urban, birding became more attractive and, with Roger Tory Peterson's first field guide in 1934, birding grew in both popularity and accuracy. By the 1960s, recreational birders were attaining new levels of expertise even as the environmental movement made birding a other pole conservation a matter of human health and planetary survival. Dunlap concludes by showing how recreation and conservation have reached a new balance in the last 40 years as scientists have increasingly turned to amateurs whose expertise had been honed by the new guides to gather the data they need to support habitat preservation. Putting nature lovers and citizen activists at the heart of his work, Thomas Dunlap offers an entertaining history of America's long-standing love affair with birds and with the books that have guided and informed their enthusiasm.
