Bioethics And The Law 2e:

Genetics and the Law II Milunsky, 2013-11-11 The law is a mandate and a mirror it both commands and reflects It should not come as a shock that scientists and physicians often prefer the mirror at times when society seems to be demanding a mandate This may be especially true in the rapidly advancing field of medical genetics where recent discoveries leading to potentially startling applications have raised old questions of law in a new light Nevertheless we believe that in general the conflict between the law and science as illustrated in the field of genetics is embroidered with exaggeration The Chief Justice of the United States Supreme Court Warren Burger has noted that the prime function of the law is to protect basic human values individual human values sometimes even at the expense of scientific progress and that it is not the function of the law to keep pace with science While both of these statements are true as far as they go we believe the law must make an affirmative effort to anticipate scientific developments so that those beneficial to society can be nurtured rather than stultified It was to nurture cooperation and understanding that we brought together a distinguished faculty of internationally known experts on law and genetics to discuss their fields in 1975 Law and Bioethics George Patrick Smith (II), 2012 George P Smith II is a leading figure in the world of medical law and ethics During his long career he has addressed some of the most important issues in bioethics and has contributed much original thought to the debates in this field This book celebrates his contribution bringing together his key writings in bioethics The chapters include previously published material however the pieces have been substantially updated to include more recent developments and rewritten drawing out the themes and strands which have run through Professor Smith's thinking over the past fifty years The book covers topics including human rights and medical law the allocation of resources and distributive justice ethical relativism science and religion and public health emergencies In doing so it offers an excellent overview of the current bioethical issues in medical law in light of recent and ongoing technological developments in medicine This collection of essays by one of the world's leading medical lawyers is academic research of the highest quality With an enviable clarity of thought and force of argument Professor Smith tackles some of the major issues facing medicine and law today It is a tour de force by an academic at the height of his powers Professor Jonathan Herring University of Oxford **Human Germline Modification and the Right to Science** Andrea Boggio, Cesare P.
