This book examines England's plural and protracted Reformations through the novel prism of the generations Approaching generation as a biological unit and a social cohort it demonstrates that the tumultuous religious developments that stretched across the sixteenth and seventeenth centuries not merely transformed the generations but were also forged by them It provides compelling new insights into how people experienced and navigated the profound challenges that the Reformations posed in everyday life Alexandra Walsham investigates how age and ancestry were implicated in the theological and cultural upheavals of the era and how these in turn reconfigured the nexus between memory history and time Generations explores the manifold ways in which the Reformations shaped the horizontal relationships that men women and children formed with their siblings kin and peers as well as the vertical ones that tied them to their dead ancestors and their future heirs It highlights the vital part that families bound by blood and by faith played in the making of current events and in recording the past for posterity Drawing on previously untapped archival evidence in tandem with a rich array of printed texts visual images and material objects this study offers poignant glimpses of individual lives and casts fascinating light on how families were both torn apart and brought closer together by the English Reformations    **Nature** ,1885    *Resources in Education* ,1986    **Marion Darche** Francis Marion Crawford,1895    The Brown Ambassador Mrs. Hugh Fraser,1895    **The Little**
