## **Basic International Taxation Second Edition Volume I Principles:**

*Basic International Taxation* Roy Rohatgi, 2005      **International Tax** Michael Honiball, 2011-03-15 This book is not merely a new edition but a complete and significantly expanded rewrite. It comprises over 900 pages of expert and in depth exposition of this complex subject that has become so important in the modern global economy. Already established over four previous editions as the pre eminent work on the subject it is a must own book for all students and practitioners of tax whether from a legal business or accounting perspective. Professor Lynette Olivier and Michael Honiball are without peer in their understanding and clarity in this highly specialised field. Five new chapters have been added on Taxation of individuals Taxation of Companies and Dividends Taxation of Partnerships Cross border VAT and Interpretation of Statutes      *Limiting Base Erosion* Erik Pinetz, Erich Schaffer, 2017-08-30 Limiting base erosion from different viewpoints Hybrid mismatch arrangements CFC rules transfer pricing rules Limiting Base Erosion the general topic for the master theses of the part time LL M program 2015 2017 has been one of the most controversial topics in international tax law ever since the initiation of the OECD BEPS Project in 2013. Even though the final reports of the 15 BEPS Actions were released by the OECD in as early as October 2015 the question how to effectively target base erosion practices still has not lost any of its topicality. Following the efforts of the OECD in developing a new international tax environment the focus of attention has now partly shifted to the OECD Member countries that have to properly implement the OECD recommendations in their domestic laws as well as in their tax treaty practice. In this respect a comprehensive analysis in the literature of all the issues related to base erosion proves to be of the utmost importance in order to provide practical guidance to the Member countries during that the process of implementation. This book deals especially with four key areas of interest: Limiting base erosion by neutralizing the effects of hybrid mismatch arrangements; Limiting base erosion by strengthening CFC rules; Measures against base erosion via interest deductions and other financial payments; Limiting base erosion by improving transfer pricing rules. On that basis 27 concrete topics were chosen in order to address the four key areas of interest from different viewpoints. Base erosion and the challenges they present read more in *Limiting Base Erosion*      *International Tax Planning and Prevention of Abuse* Luc De Broe, 2008 This study considers how tax authorities attempt to strike down international tax avoidance structures in particular those involving the use of conduit and base companies set up by third country residents for purposes of treaty shopping and EC Directive shopping. The book focuses on the interaction between provisions and judicially developed doctrines of domestic tax law preventing international tax avoidance on the one hand and norms of international law in particular tax treaties and rules of Community law on the other. It also considers treaty based anti avoidance measures such as the beneficial ownership requirement and limitation on benefits provisions. This part of the study compares and analyses the case law of Australia Austria Belgium Canada the Czech Republic Finland France Germany India the Netherlands Switzerland the United Kingdom and the United States      *OECD/G20 Base Erosion and Profit Shifting Project Addressing*

*the Tax Challenges of the Digital Economy, Action 1 - 2015 Final Report* OECD, 2015-10-05 Addressing base erosion and profit shifting BEPS is a key priority of governments In 2013 OECD and G20 countries working together on an equal footing adopted a 15 point Action Plan to address BEPS This publication is the final report for Action 1 **Basic International Taxation** Roy Rohatgi, 2006-10 Basic International Taxation provides a uniquely comprehensive overview of the basic principles of the international taxation and considers these in the context of practical planning guidance The analysis of the practical application of these principles is supported by a detailed review of current international tax practices by leading professionals in over sixty jurisdictions worldwide Volume II Practice includes practical guidance on international tax planning techniques the use of offshore financial centres for international tax planning a brief country tax profile of over sixty countries an analysis of anti avoidance rules and an overview of some of the current issues in international taxation

OECD/G20 Base Erosion and Profit Shifting Project Addressing the Tax Challenges of the Digital Economy OECD, 2014-09-16 This book presents an analysis of the challenges the spread of the digital economy poses for international taxation *Bulletin for International Taxation*, 2006 Special Features of the UN Model Convention Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention s unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and or user i e the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master s theses of the full time LL M program 2018 2019 for which Special Features of the UN Model Convention has been chosen as the general topic With this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is

supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD's BEPS project on the UN Model Basic International Taxation (Volume II - Practice) 2Nd/ Ed. Hari Om Jindal, 2007 Basic International Taxation provides a uniquely comprehensive overview of the basic principles of international taxation and considers these in the context of practical planning guidance. The analysis of the practical application of these principles is supported by a detailed review of current international tax practices by leading professionals in over sixty jurisdictions worldwide Transfer Pricing Aspects of Intra-Group Financing Raffaele Petruzzi, 2013-10-20 For corporate managers maximization of the profits and the market value of the firm is a prime objective. The logical working out of this principle in multinational enterprises has led to an intense focus on transfer pricing between related companies principally on account of the very attractive tax advantages made possible. Inevitably numerous countries have established transfer pricing legislation designed to combat the distortions and manipulations that are inherent in such transactions. This important book, one of the first in depth analysis of the current worldwide working of transfer pricing in intra group financing and its resonance in law, presents the relevant issues related to loans, financial guarantees and cash pooling, analyses an innovative possible approach to these issues and describes new methodologies that can be implemented in practice in order to make intra group financing more compliant with efficient corporate financing decisions and the generally accepted OECD arm's length principle. Comparing the tax measures implemented in the corporate tax law systems of forty countries, this study investigates such aspects of intra group financing as the following: corporate finance theories, studies and surveys regarding financing decisions, application of the arm's length principle to limit the deductibility of interest expenses, impact of the OECD's Base Erosion and Profit Shifting (BEPS) project, transfer pricing issues related to intra group financing, credit risk in corporate finance, rationales utilized by credit rating agencies and the assessment of arm's length nature of intra group financing. The author describes ways in which the application of the arm's length principle can be strengthened and how the related risk of distortion and manipulation can be minimized. The solutions and methodologies proposed are applicable to any business sector. Given that determination of the arm's length nature of transactions between related companies is one of the most difficult tasks currently faced by taxpayers and tax administrations around the world, this thorough assessment and analysis will prove extraordinarily useful for in-house and advisory practitioners, corporate officers, academics, international organizations and government officials charged with finding effective responses to the serious issues raised. In addition to its well researched analysis, the book's comparative overview of how loans, financial guarantees and cash pooling are currently addressed by OECD Member States and by their national courts is of great practical value in business decision making. **The Law Times**, 1913 *The Economic Journal*, 1896 Contains papers that appeal to a broad and global readership in all fields of economics **The University of Tennessee Extension Series**, 1930 *The Bookseller*, 1920 **The Classified Property Tax in the United States** Simeon Elbridge Leland, 1928
