Translations from Communist ,1968 The Turning-point of World War II Boris Grigor'evich Solov'ev,1982 **Why the Axis Lost** John Arquilla,2020-02-27 The factors leading to the defeat of the Axis Powers in World War II have been debated for decades One prevalent view is that overwhelming Allied superiority in materials and manpower doomed the Axis Another holds that key strategic and tactical blunders lost the war from Hitler halting his panzers outside Dunkirk allowing more than 300 000 trapped Allied soldiers to escape to Admiral Yamamoto falling into the trap set by the U S Navy at Midway Providing a fresh perspective on the war this study challenges both views and offers an alternative explanation the Germans Japanese and Italians made poor design choices in ships planes tanks and information security before and during the war that forced them to fight with weapons and systems that were too soon outmatched by the Allies The unprecedented arms race of World War II posed a fundamental design challenge the Axis powers sometimes met but never mastered **Death of the Wehrmacht** Robert Michael Citino,2007 A deft lively and highly readable history of the demise of the German way of war As the allies found an antidote to the shock and awe approach of the Wehrmacht the once mighty German army underwent an epic fall from remarkable operational victories to crushing operational defeats forced to take on a defensive stance in a war it could never win

Blitzkrieg to Desert Storm Robert Michael Citino,2004 When Germany launched its blitzkrieg invasion of France in

1940 it forever changed the way the world waged war. Although the Wehrmacht ultimately succumbed to superior Allied firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations were rarely executed as effectively. Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level. Offering detailed operational analyses of actual campaigns Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable. He provides analyses of Israeli operational victories in successive wars until the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape US doctrine in surprising ways. Looking beyond major power conflicts he also reveals the lessons of India's blitzkrieg like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran Iraq War. Citino especially considers the evolution of US doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties. He also provides one of the first scholarly analyses of Operation Iraqi Freedom showing that its plan was curiously divorced from the realities of military history grounded instead on nebulous theories about expected enemy behavior. Throughout Citino points to the importance of mobility especially mobilized armor in modern operational warfare and assesses the respective roles of firepower training doctrine and command and control mechanisms. Brimming with new insights Citino's study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare. Blitzkrieg to Desert Storm provides that grounding as it addresses the future of operational level warfare in the post 9 11 era.

Corps Commanders of the Bulge Harold R. Winton, 2007. *Study of the Battle of the Bulge* *American Monthly Review of Reviews* Albert Shaw, 1919 **Special Bibliography**, 1977 *The Papers of Dwight David Eisenhower: The war years* Dwight David Eisenhower, 1970 *The American Book Publishing Record*, 1968 **A Time for Trumpets** Charles B. MacDonald, 1985. On December 16 1944 the vanguard of three German armies totaling half a million men attacked US forces in the Ardennes region of Belgium and Luxembourg achieving what had been considered impossible total surprise. In the most abysmal failure of battlefield intelligence in the history of the US Army 600 000 American soldiers found themselves facing Hitler's last desperate effort of the war. The brutal confrontation that ensued became known as the Battle of the Bulge the greatest battle ever fought by the US Army a triumph of American ingenuity and dedication over an egregious failure in strategic intelligence. *A Time for Trumpets* is the definitive account of this dramatic victory told by one of America's most respected military historians who was also an eyewitness. MacDonald commanded a rifle company in the Battle of the Bulge. His account of this unique battle is exhaustively researched honestly recounted and movingly authentic in its depiction of hand to hand combat. Mingling firsthand experience with the insights of a distinguished historian MacDonald places this profound human drama unforgettably on the landscape of history.
