Communication and Educational Technology - E-Book Suresh Sharma, 2016-04-28 Communication and Educational Technology is precisely written as per the syllabus prescribed for the undergraduate nursing studies. It is useful as an introductory textbook for the postgraduate nursing students and can also be of help for the other health care professionals to understand the concepts of communication and teaching learning pedagogy. The book is an excellent attempt towards introducing the readers to the basics of communication and educational technology in the education of nurses and other health care professionals. Advanced Accounting 9e uses the complete equity method to allow students to focus on accounting concepts rather than bookkeeping techniques in learning consolidation material. The presentation of consolidation material and the use of excerpts from popular business press and references to real world companies and governmental and non profit institutions are used to illustrate key concepts and maintain a strong student orientation. **Rhetorical Theory and Praxis in the Business**

The volume includes topics such as rhetorical grammar, genre awareness in business communication theory, the role of big data in message strategy, social media and memory, and the connection between rhetorical theory and entrepreneurship. These essays provide the business communication scholar, practitioner, and program administrator insight into the rhetorical considerations of the business communication landscape. **Forthcoming Books** Rose Arny, 2003 *Catalog of Copyright Entries. Accounting: Chapters 12-18 Charles T. Horngren, Walter T. Harrison, Jr., W. Morley Lemon, 2001 The Demo Docs System of instruction replicates the classroom experience by providing more I get it moments outside of class. We've talked to tons of POA instructors and our editors have even taken the accounting course numerous times to figure out the following issue in this course: that is consistent. Students understand or get it right after you do a problem in class, but as soon as they leave class with each passing hour, their ability to do the problems again and complete their homework diminishes to the point of them either having to come to office hours to get help or they just quit and get behind in the course. On top of this, you can

end up getting behind in the course as well in order to keep everyone on track The Demo Docs system helps to recreate the I
get it moments outside of class keeping both you and the students on track **Books in Print Supplement** ,2002 **The**
