**Migraines and Dreams** Altan Loker,2003 The method of scientific investigation used in this book and explained in its first chapter is the method described by Isaac Newton in his book The Principia which is continually used by him and all other physicists but not by psychologists The great truth exposed by using this method to understand migraine is that the head pain and the associated symptoms are automatic responses created by evolution and controlled unconsciously to realize self protection and survival This fact is also derived from Freud s and Jung s works by using Newton s method It is also shown that the results of research on the physiological processes that are related to the production of headache do not make the above etiology impossible but rather suggest it A migraineur has a problem that harms his her interests seriously but he she does not deal with it adequately for various reasons and represses it in some measure His her unconscious produces

symptoms that carry analogic messages urging him/her to resolve that problem and also punish him/her for not doing that. Sometimes a symptom is so timely and intense that it prevents a self-harming action. Thus headache means "Get wise, stop making that mistake, stop hurting yourself." Eye pain means "Don't ignore the events that hurt you." Nausea and vomiting mean "Don't tolerate ugly events." The other symptoms too carry self-protective messages related to the patient's life experiences. Psychotherapy consists of making a patient consciously understand and deal adequately with the problem that his/her unconscious wishes him/her to resolve so that the symptoms become unneeded as message carriers. Evidently this method necessitates cooperation with the unconscious whereas all existing therapies combat its products, i.e. the symptoms and thereby make the symptoms all the more needed. A migraineur can do this work with or without the help of a therapist who is familiar with this method. Dreams too are automatic responses that serve to realize self-protection and survival and carry more diagnostic and therapeutic information and ideas compared to symptoms. Also dreams can be induced that deal with consciously chosen issues. Therefore symptoms and dreams are interpreted together as explained in this book. This theory predicts a patient's relevant life experiences in general terms, facilitates the discovery of their particulars, explains the causes, meanings and functions of his/her symptoms and dreams and realizes very fast and definitive cures. More than 120 headache and facial pain sufferers have been cured in very short times using this method as illustrated by 50 original case histories. This book is published for the use of headache patients and their therapists and contains the relevant chapters of my earlier book *COGNITIVE BEHAVIORAL CYBERNETICS OF SYMPTOMS DREAMS LATERALIZATION THEORY INTERPRETATION THERAPY*. This earlier book exposes the adaptive and self-protective functions of the most conspicuous automatic responses such as pain, fear, anxiety, repression, all symptoms of primary mental disorders, response to stage and screen plays, laughter and tears, structural responses such as cerebral lateralization and so forth. The fact that all those phenomena can be explained, predicted and controlled on the basis of the same principles proves that those principles reflect the truth.

*Managing Migraine: A Healthcare Professional's Guide to Collaborative Migraine Care*, 2010      [The Migraine Solution](#)  
Paul Rizzoli, Elizabeth Loder, Liz Neporent, 2025-05-21. A straightforward, engaging, up-to-date guide to migraine and its treatment.
