**Exame, 1996 Introducción a los procesadores de texto dirigido a adultos mayores** Vania Israde Juárez, Editorial Digital UNID, 2018-04-10. En la actualidad el manejo de las tecnologías de la información y la comunicación son parte importante en el desarrollo social ya que los avances tecnológicos han sido esenciales en la modernización de los procesos productivos administrativos y de control que se van implantando en los sectores empresariales públicos y privados generando una dinámica de actualización para operar las nuevas herramientas en cada uno de los ámbitos de trabajo se ha insistido en que los nuevos recursos deben ser parte integral de las actividades el desarrollo fundamental para muchos ha sido cómo usar dichos recursos. El personal que tiene varios años trabajando de forma manual se siente desplazado y por consiguiente su autoestima baja y se enfrenta a la realidad debe aprender a utilizar la tecnología o renunciar. Por otro lado es común que al retirarse los jubilados instalen pequeños negocios que operan de forma manual y no quieren automatizar los procesos administrativos o de control porque no saben cómo opera el equipo por temor a que vayan a perder la información o simplemente por no conocer su funcionamiento se niegan a instalar computadoras en sus empresas y esto causa conflicto al sentir la creciente presión de autoridades hacendarias y municipales a ingresar para realizar trámites a sistemas instalados en Internet. Otro factor es la necesidad de superación personal por aprender a escribir en una computadora acceder a la Red o sentirse aceptados por su grupo social ya que los adultos que no saben utilizar la computadora sienten que no pueden apoyar a sus hijos en la búsqueda de información para los trabajos escolares y se perciben infelices o devaluados por lo que no se consideran un ejemplo a seguir dada su falta de habilidades en el uso de las nuevas tecnologías se les juzga analfabetas y van quedando rezagados porque no saben de qué hablan lo que motiva en ocasiones que se alejen por la pena de ignorar acerca del tema o se vuelven en contra de la tecnología como una manera de autoprotección a su ignorancia.
