**Mapping the linkages between agriculture, food security and nutrition in Malawi** Aberman, Noora-Lisa, Meerman, Janice, Benson, Todd, 2015-12-16

Smallholder agriculture is the mainstay of Malawi's economy. Its importance for livelihoods cannot be overstated. 94 percent of rural residents and 38 percent of urban residents engage in agriculture to some extent. Jones Shrinivas and Bezner Kerr 2014 the vast majority as smallholder farmers with landholdings of less than one hectare. Smallholder crops are primarily maize which accounted for nearly 80 percent of smallholder cultivated land in 2011 followed by cassava and other food crops. FAO 2008 IFAD 2011. These foods are grown for household consumption and for sale at local and regional markets. As such the Malawian food supply especially in rural areas where markets are thin with few buying or selling options is shaped largely by trends in smallholder food crop production.

*Progress in African Agriculture* David C. Catt, 1970

Disentangling food security from subsistence agriculture in Malawi Benson, Todd, 2021-05-24

Many rural Malawian households cannot reliably obtain enough food to meet their needs even though most have access to arable land for food production. This book calls for three critical changes to promote sustainable food security in Malawi: 1 government support for a significantly more diversified and commercially oriented agriculture sector; 2 increased agricultural productivity of rural farmers; and 3 strengthened food markets.

**Agriculture, food security, and nutrition in Malawi: Leveraging the links** Aberman, Noora-Lisa, Meerman, Janice, Benson, Todd, 2018-02-22

Although the Malawian food supply is shaped largely by trends in smallholder food crop production, Malawi's decades long focus on improving smallholder productivity has only moderately improved food security and nutrition outcomes. Country statistics indicate an estimated 36.7 percent of rural Malawian households failed to access sufficient calories between 2010 and 2011. During the same period 47 percent of children under the age of five years were estimated to be stunted in their growth. These indicators imply that some Malawian diets are lacking in terms of quantity, total calories consumed, and most are lacking in terms of quality, sufficient calories derived from nutrient dense foods such as meat, fish, eggs, dairy, legumes, fruits, and vegetables. Good nutrition requires both enough total calories, quantity, and enough vitamins and minerals per calorie, quality. How can Malawi better leverage its smallholder agriculture sector to improve nutrition? This report provides a series of primary and secondary data analyses that examine different aspects of this question.
