Ancient Rings T.N. Pollio, 2018-11-01 Ancient finger rings made of base metals and low grade silver alloys are increasingly being unearthed and sold through a growing assortment of marketplaces worldwide Reference material on ancient rings has focused mainly on historic and high end pieces the precious metals and stones of royalty and the wealthy while little has been written on the evaluation of common rings This guide describes their composition structure and imagery thus providing merchants collectors and researchers with a comprehensive reference on these ancient artifacts that until now have gone unexamined

Rings of the Ancient World Jeffrey Spier, Jack Ogden, 2015 The Yevdayev Collection of ancient rings comprises 59 superb examples from Egypt Phoenicia Persia Greece Etruria and Rome dating from the second millennium BC to the fourth century AD The rings are of many different shapes most made of gold or silver and often set with gems but some are carved from semiprecious stone amber and shell The collection begins with four Egyptian rings of the New Kingdom period of various types and materials including an amethyst scarab set in a gold swivel ring a ring carved from cornelian with the cartouche of Pharaoh Thutmose III and a silver ring with the name of Amenhotep II These are followed by rare examples of a Hittite gold ring and a Persian ring carved from shell There is a good selection of Phoenician rings dating from the seventh to fifth century BC including rings in gold and stone scarabs set in rings Other unusual rings include Persian examples of the Achaemenid and Sasanian period a unique diamond ring that is likely Kushan a Central Asian ring in Scythian style and a gold ring with South Arabian inscription Greek and Roman rings are particularly well represented Classical Greek rings dating from the fifth and fourth centuries BC include examples in gold with engraved bezels bezels decorated with filigree and granulation and a rare ring with a swivel bezel decorated with figures in gold foil under glass Hellenistic rings dating from the third to first centuries BC are often set with large and fine gems often engraved and hoops carved in architectural style There is also a Hellenistic ring carved from black glass and a fine example of a gold snake ring decorated with an emerald The Roman rings date from the time of Augustus in the late 1st century BC to the fourth century AD Many of the rings are gold set with finely engraved gems in amethyst cornelian green chalcedony red jasper and nicolo and include important portraits of Agrippina Senior in cameo and Septimius Severus in chalcedony Other rings are set with rare gems including an aquamarine and a diamond There are also rings carved from other materials including rock crystal and amber The catalogue concludes with gold rings of the later empire third fourth century AD typically with large carved

gold hoops and unengraved gems The rings in the Yevdayev collection are notable not only for their exceptional design and craftsmanship but for their rich imagery engraved on the rings and gems The publication will appeal to both students of ancient art and history and to collectors and lovers of jewelry and fine art The accompanying text places the rings in their historical and artistic context and provides valuable technical observations *The Historic Note-book, with an Appendix of Battles* Ebenezer Cobham Brewer,1891 **Rings Through the Ages** James Remington McCarthy,1945 History of a Ring One of the Governor's Wards,1877 *Westfield and Its Historic Influences, 1669-1919* John Hoyt Lockwood,1922 *Antique Jewellery and Trinkets* Fred W.
