

"Deftly steering clear of dogma, never sounding like a sanctimonious scold, Eric Brende makes a persuasive case that most of us would enjoy life more by radically minimizing our reliance on modern technology. *Better OFF* is a buoyant, thought-provoking, and very entertaining read."

Better Off Flipping The Switch On Technology:

Better Off Eric Brende, 2009-10-13 Ditching their car electric stove refrigerator running water and everything else motorized or hooked to the grid the Brende family conceives a real life experiment to see if in fact all our cell phones wide screen TVs and SUVs have made life easier and better or whether life would be preferable without them By turns the query narrows down to a single question What is the least we need to achieve the most With this in mind the Brendes begin an 18 month trial run that will dramatically change the way they live and prove entertaining and surprising to students *Better Off* is a smart often comedic and always riveting book that also mingles scientific analysis with the human story demonstrating how a world free of technological excess can shrink stress and waistlines and expand happiness health and leisure Deftly steering clear of dogma never sounding like a sanctimonious scold Eric Brende makes a persuasive case that most of us would enjoy life more by radically minimizing our reliance on modern technology *Better Off* is a buoyant thought provoking and very entertaining read Jon Krakauer author of *Into the Wild* and *Into Thin Air* *The Cape Town Commitment: A Confession of Faith, A Call to Action* Darrell L. Bock, 2013-06-14 The Cape Town Commitment which arose from The Third Lausanne Congress on World Evangelization Cape Town 2010 stands in the historic line of The Lausanne Covenant 1974 and The Manila Manifesto 1989 It has been translated into twenty five languages and has commanded wide acceptance around the world The Commitment is set in two parts Part 1 is a Confession of Faith crafted in the language of covenantal love Part 2 is a Call to Action The local church mission agencies special interest groups and Christians in the professions are all urged to find their place in its outworking This annotated bibliography of The Cape Town Commitment arranged by topic has been compiled by specialists in a range of fields As such it is the first bibliography of its kind Arranged in sections for graduate level teaching Equally useful for research students **Pursuing Quality of Life** Leonard Nevarez, 2011-03-29 From anxieties over work life balance and entangling technologies to celebrations of cool jobs and great places to live quality of life frames the ways we enhance our lives and legitimate social change today But how does the idea of quality of life envision the greater good and what gets lost as a result This book provides the critical framework for understanding the idea s contexts and tensions that are conspicuously missing in popular discussions professional activities and scholarly research on quality of life With multiple case studies taken across North America and Europe it provides a sociological perspective on the contradictory ways we talk about and pursue quality of life in relation to technology consumerism family work public space rural ways of life and ultimately the final years of life Drawing on contemporary and classical social theory it provides an incisive account of the historical shifts in developed societies over the last half century that have transformed our views and pursuits of quality of life Originally a promise to undertake collective effort and pursue social justice at a moment of unprecedented opportunity quality of life now enshrines a solipsistic ideal with which to accommodate the storms of market forces and political failure Journal of Technology Education ,2006 *Connecting Science and Engineering Education*

Practices in Meaningful Ways Leonard A. Annetta, James Minogue, 2016-03-02 The need for a scientifically literate citizenry one that is able to think critically and engage productively in the engineering design process has never been greater By raising engineering design to the same level as scientific inquiry the Next Generation Science Standards NGSS have signaled their commitment to the integration of engineering design into the fabric of science education This call has raised many critical questions How well do these new standards represent what actually engineers do Where do the deep connections among science and engineering practices lie To what extent can or even should science and engineering practices co exist in formal and informal educational spaces Which of the core science concepts are best to leverage in the pursuit of coherent and compelling integration of engineering practices What science important content may be pushed aside This book tackles many of these tough questions head on All of the contributing authors consider the same core question Given the rapidly changing landscape of science education including the elevated status of engineering design what are the best approaches to the effective integration of the science and engineering practices They answered with rich descriptions of pioneering approaches critical insights and useful practical examples of how embodying a culture of interdisciplinarity and innovation can fuel the development of a scientifically literate citizenry This collection of work builds traversable bridges across diverse research communities and begins to break down long standing disciplinary silos that have historically often hamstrung well meaning efforts to bring research and practice from science and engineering together in meaningful and lasting ways
