Karlson,Dale Rosselet,2015-05-05 A highly visual guide to identifying birds in the field based on the important unchanging features of size shape structure and behavior Birding is an extremely rewarding and fun hobby but some situations can be frustrating or unsuccessful because of a variety of challenging viewing conditions This guide to identifying birds offers the holistic birding by impression method which not only helps with these difficult conditions but also develops an efficient mental identification process using left and right brain skills It begins with a conscious assessment of a bird's unchanging physical characteristics including general size body shape structural features bill legs neck and wings and behavior Using this approach birders can quickly assess all birds and distinguish new and uncommon species from familiar ones They can then examine more detailed field marks to fine tune the identification Rather than a traditional field guide this book presents an interactive how to approach to a more complete identification process

Kulanovic,2025-11-07 Current research on sustainability transitions on aviation heavily favours technological innovation largely overlooking the crucial socio political dynamics that govern sustainability transitions Achieving the aviation industry's ambitious Paris Agreement decarbonization targets requires more than technical solutions This thesis bridges that gap by examining the role of political discourses within the Multi Level Perspective MLP on the political acceptance of sustainable aviation and its corresponding niche innovations The focus lies on politicization polarization and policy implications In this thesis frames and narratives are key tools of sensemaking and influence not only shaping perceptions but also being reshaped by policy actors to align with their objectives This perspective enhances our understanding of how discourses operate at a deeper cognitive and cultural level affecting the trajectory of sustainability transitions such as acceptance of particular sustainable niche innovations This thesis explores how these dynamics influence the development support and opposition of niche innovations within the aviation sector Specifically it investigates how conflicting narratives can create lock ins that hinder sustainability transition This thesis highlights that while discourses can promote niche innovations by enhancing legitimacy and social acceptance other discourses can obstruct progress by fostering social resistance and diminishing policy support This dynamic is particularly evident in the Swedish transport sector where sustainable aviation has encountered both support and resistance influenced by competing political narratives Using a comprehensive theoretical framework integrating discourse analysis MLP and socio technical transitions the research examines how sense making affects sustainable aviation's future the factors enabling or hindering discursive governance and how discursive pathways of sustainability transitions evolve with or without policy support The thesis employs focus groups and semi structured interviews with stakeholders in the Swedish aviation industry to uncover how niche innovations in sustainable aviation are discursively framed supported or opposed The research findings reveal that politicization and polarization create lock ins characterized by polarization between opposing discourses which are a critical barrier to sustainable aviation These

discursive lock ins can obstruct policy leadership and limit the emergence of niche innovations such as drones The research argues that a nuanced understanding of politicization and polarization is essential for identifying pathways to overcome these barriers and for designing effective policies that support sustainable aviation transitions Forskning om h llbarhets verg ngar f r flyget fokuserar p teknologisk innovation men f rbiser det avg rande sociopolitiska perspektivet Att n flygindustrins h llbarhetsm l kr ver mer n enbart tekniska l sningar Denna avhandling fyller detta forskningsgap genom att unders ka de politiska diskursernas roll inom Multi Level Perspective MLP med fokus p politisk acceptans av h llbart flyg och dess nischinnovationer Studien fokuserar p politisering polarisering och policyimplikationer Ramar och narrativ ses som centrala verktyg f r meningsskapande vilka formar och omformas av policyakt rer f r att anpassas till deras m l och d rmed p verkar acceptansen av h llbara nischinnovationer Avhandlingen utforskar hur denna dynamik skapar l sningar som hindrar verg ngen Diskurs kan antingen fr mja nischinnovationer genom kad legitimitet och social acceptans eller hindra dem genom att skapa motst nd och minska politiskt st d Denna dynamik r s rskilt relevant i den svenska transportsektorn d r h llbart flyg har m tt konkurrerande politiska narrativ Med hj lp av ett ramverk som integrerar diskursanalys MLP och socio tekniska verg ngar unders ker denna avhandling hur meningsskapande p verkar h llbart flyg Avhandlingen anv nder fokusgrupper och semi strukturerade intervjuer med intressenter i den svenska flygindustrin f r att analysera hur nischinnovationer diskursivt inramas Resultaten visar att politisering och polarisering skapar kritiska diskursiva l sningar som r ett betydande hinder f r framtiden f r h llbart flyg Dessa l sningar hindrar politiskt ledarskap och begr nsar framv xten av nischinnovationer t ex dr nare Forskningen argumenterar att en nyanserad f rst else f r politisering och polarisering r avg rande f r att identifiera v gar f r att vervinna dessa barri rer och f r att utforma effektiva policyer som st der verg ngen Library Journal Melvil Dewey, Richard Rogers Bowker, L.
