 <p>The diagram shows a yellow lighted bulb on the left. A rectangular card board is placed in the middle, with a small hole in its center. A screen is placed on the right. Light rays are shown as blue lines originating from the bulb and passing through the hole in the card board. On the screen, a white circular 'Light Spot' is visible, and a dark 'Shadow' of the bulb is cast to the left of the spot. Labels with arrows point to the 'Lighted Bulb', 'Card board', 'Hole', 'Screen', 'Light Spot', and 'Shadow'.</p>	Place a lighted bulb in front of a rectangular card board with a hole at the center	A shadow with a spot light appears in the screen.	Light rays are passing only through the hole and are not allowed by the remaining part of card board
 <p>The diagram shows a yellow lighted bulb on the left. A pencil is placed vertically in the middle, between the bulb and a screen on the right. Light rays are shown as blue lines originating from the bulb and passing behind the pencil. On the screen, a dark 'Shadow' of the pencil is cast. Labels with arrows point to the 'Lighted Bulb', 'Pencil', 'Screen', and 'Shadow'.</p>	Place a pencil in the path of light ray coming from a bulb	A shadow of pencil appears in the screen	The size of the shadow is proportional to the size of the opaque objects.

*The Literary Works of L. Da Vinci* Leonardo (da Vinci), 1883      *The Aesthetics of Shadow* Daisuke Miyao, 2013-03-04 In this revealing study Daisuke Miyao explores the aesthetics of shadow in Japanese cinema in the first half of the twentieth century This term coined by the production designer Yoshino Nobutaka refers to the perception that shadows add depth and mystery Miyao analyzes how this notion became naturalized as the representation of beauty in Japanese films situating Japanese cinema within transnational film history He examines the significant roles lighting played in distinguishing the styles of Japanese film from American and European film and the ways that lighting facilitated the formulation of a coherent new Japanese cultural tradition Miyao discusses the influences of Hollywood and German cinema alongside Japanese Kabuki theater lighting traditions and the emergence of neon commercial lighting during this period He argues that lighting technology in cinema had been structured by the conflicts of modernity in Japan including capitalist transitions in the film industry the articulation of Japanese cultural and national identity and increased subjectivity for individuals By focusing on the understudied element of film lighting and treating cinematographers and lighting designers as essential collaborators in moviemaking Miyao offers a rereading of Japanese film history

*A Corpus of Rembrandt Paintings V* Ernst van de Wetering, 2013-12-12 This volume is the fifth volume of *A Corpus of Rembrandt Paintings* a project devoted to all Rembrandt's paintings This is the work of The Rembrandt Research Project consisting of a group of scholars led since 1993 by Professor Ernst van de Wetering The project began in 1968 with the aim of separating Rembrandt's own paintings from the vast number of Rembrandtesque paintings made by his many apprentices and followers Having opted for a chronological approach to the cataloguing of Rembrandt's paintings from 1625 till 1642 in the first three volumes it was decided in 1993 to adopt a thematic approach for further volumes This was largely to facilitate the recognition of different hands The new approach yielded much more information not only about Rembrandt's working methods but also about the function and meaning of his works This expanded field of view meant that etchings and drawings with similar themes also needed to be included In 2005 Volume IV appeared devoted to Rembrandt's self portraits in painting etching and drawing Volume V consists of a catalogue and analysis of the so called small scale history and genre paintings That theme was chosen because this type of complex work shows a variety of full length protagonists acting in different narrative settings For this reason in the 17th century painting etching or drawing biblical and mythological scenes was looked upon as an artist's greatest challenge The choice of this theme proved to be highly fruitful in several ways Small scale history pieces reveal Rembrandt's artistic ambitions most clearly They also offer the authors a much more accurate view of the daily routine in Rembrandt's studio his apprentices mostly copied this type of work or used it as a starting point for their own As a result it was easier to distinguish the works by the master himself from those of his pupils All aspects of the skills necessary to create a pictorial illusion play a part in the creation of small figured history paintings These aspects were referred to as the basis of the noble

art of painting in Rembrandt's days Two seventeenth century painter theoreticians discussed these principles systematically in two books which up till now have only sporadically been consulted in the context of 17th century studio practice Karel van Mander wrote his *Grond der edel vry schilder const* Basis of the Art of Painting in 1604 and Samuel van Hoogstraten produced his *Inleyding tot de hooge schoole der schilder konst* Academy of Painting in 1678 Van Hoogstraten was a pupil of Rembrandt between 1642 and 48 Comparing the two books and considering them in relation to Rembrandt's oeuvre gradually reveals his original views on painting and how these had developed during his career Thus the authors of this new Volume of A Corpus have gained an unexpected and profound insight into Rembrandt's ideas and approach to his art The basic aspects of painting included the following topics function and methods of drawing human proportions various positions poses and gestures of figures ways of arranging a scene's protagonists in a composition facial expressions of a variety of emotions light shadows and reflected light landscape and animals draperies and articles of clothing methods of painting and various characteristics and uses of colours The way these basic aspects were selected and dealt with presumed that the more practical side to the art of painting would be learned by the apprentice in the daily routine of his master's studio With the development of art history in the nineteenth century the basic aspects of the art of painting listed above acquired the vague label of style However the seventeenth century categorization of the basic aspects provides a much more acute means of probing the views and criteria for judging a painting by Rembrandt and his contemporaries than the concept of style Volume V in the series A Corpus of Rembrandt Paintings breaks new ground from the point of view of art history not only in its approach to Rembrandt as an artist but more particularly to his thinking about painting Moreover a detailed comparison of Rembrandt's works and those by his apprentices who based their works on his led to a profound and detailed understanding of Rembrandt's views on pictorial quality In art historical literature quality usually does not feature prominently since it is regarded as being too subjective This comparative approach together with the analysis of seventeenth century categories of thought about painting have given the research on Rembrandt a new impetus at the same time allowing us to see more clearly through seventeenth century eyes That is why the new volume of the Corpus is an important publication not only for art historians but also for all who want to fully enjoy the numerous works of art that date back to the Dutch Golden Age now scattered in museums around the world

what is beautiful and what is not Most areas of construction such as statics and building physics are measurable and can therefore be substantiated with objective arguments Yet this does not apply to the unquantifiable aesthetics of architecture Accordingly judgments on aesthetics are always subject specific and strongly dependent on the viewer Nevertheless the aesthetics of architecture is not just a matter of taste Many relationships between buildings as objects and viewers as subjects can be determined objectively with the help of perceptual psychology and information theory as this book demonstrates
