**Birds and Insects** Peggy Macnamara, 2008 Influential American architect Philip Johnson once mused All architecture is shelter all great architecture is the design of space that contains cuddles exalts or stimulates the persons in that space But with just a small swap of a key word Johnson could well have been describing animal nests Birds and insects are nature's premier architects using a dizzying array of talents to build functional homes in which to live reproduce and care for their young Recycling sticks branches grass and mud to construct their shelters they are undoubtedly the originators of green architecture A visual celebration of these natural feats of engineering and ingenuity Architecture by Birds and Insects allows readers a peek inside a wide range of nests offering a rare opportunity to get a sense of the materials and methods used to build them Here we see the kinds of places where nests are built for instance the house wren has been known to occupy cow skulls flower pots tin cans and the pockets of hanging laundry while the uglynest caterpillar prefers rose bushes and cherry trees Inspired by the vast nest collection at the Field Museum which features specimens gathered throughout North and South America Peggy Macnamara's paintings are enhanced by text written by museum curators This narrative provides a foundation in natural history for each painting as well as fascinating anecdotes about the nests and their builders Like so many natural treasures nests are easy to ignore But Macnamara's gorgeous paintings will undoubtedly change that Architecture by Birds and Insects at last gives the tiniest engineers their rightful moment in the spotlight and in so doing increases awareness and encourages the protection of birds insects and their habitats Readers will never look at a Frank Gehry design or a treetop nest the same way again

How Birds Build Their Amazing Homes W. Wright Robinson, 1999 Describes the different designs and construction techniques used by various birds to build nests that best suit their needs Also provides information about particular species mentioned

**Bird Nests** Stacy Tornio, 2018-08-01 Explains the process and materials that birds use to build nests This book's colorful photos clear text and A Closer Look feature highlight the engineering that makes this structure such a marvel and helps birds survive in the wild

Nest Building and Bird Behavior Nicholas E. Collias, Elsie C. Collias, 2014-07-14 This book is a comprehensive study of nest building behavior in birds A much needed synthesis of the previously scattered literature on this central aspect of avian biology it is organized by behavior problems and focuses on evolution as its unifying theme Originally published in 1984 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
