Web Services Business Strategies and Architectures Mike Clark,Peter Fletcher,Jeffrey J. Hanson,Romin Irani,Mark Waterhouse,Jorgen Thelin,2013-12-14 Adopting Web Services will affect many processes within any organization To throw light on the most important issues we have commissioned Experts in the Industry to share their insights The resultant papers cover a broad spectrum from architecture to business strategies without diverting into deep technological fashions Each study in the collection will answer specific business challenges thrown up by Web Service architectures Before changing commissioning or evaluating a Web Service initiative all IT Managers System Architects Lead Developers and Business Visionaries should study and reference this book **Intelligent Agents and Multi-Agent Systems** Michael Wayne Barley,Nik Kasabov,2005-03-08 This book constitutes the thoroughly refereed post proceedings of the 7th Pacific Rim International Workshop on Multi Agents PRIMA 2004 held in Auckland New Zealand in August 2004 in conjunction with PRICAI 2004 The 24 revised full papers presented went through two rounds of reviewing and improvement and were selected from 52 submissions The papers address many current topics in multi agent research and development ranging from theoretical and methodological issues to various applications in different fields **e-Business in Construction** Chimay J. Anumba,Kirti Ruikar,2009-01-21 With a number of disparate often geographically distributed organisations involved in the delivery of construction projects there has been considerable interest in e business tools within the construction industry These tools open up a range of possibilities for the industry to rethink existing processes and working methods so their use is increasingly common Nevertheless there has been little definitive guidance for practitioners researchers and students on the major issues

in electronic business from a construction perspective. By bringing together 16 contributions from research and industry covering theory, technological issues, practical implementation and legal matters and illustrated with a number of case studies, *e Business in Construction* fills that gap. Starting with the theoretical aspects of e-commerce and moving on to consider the specifics of the construction context, it includes a mechanism for the assessment of the e-readiness of construction sector organisations. The middle part of the book focuses on the role of various technologies in e-business with examples included as appropriate. This is followed by a discussion of practical legal and trust issues. The potential of next generation of information and communication technologies is also addressed. With a fine blend of theoretical and practical aspects of e-commerce in construction and well illustrated with a number of industrial case studies, *e Business in Construction* will find an appreciative audience of construction practitioners, researchers and students at all levels.

Understanding New Media Kim H. Veltman, 2006 This book outlines the development currently underway in the technology of new media and looks further to examine the unforeseen effects of this phenomenon on our culture, our philosophies and our spiritual outlook.

Agents and Multi-Agent Systems in Construction Chimay Anumba, Zhaomin Ren, O.O. Ugwu, 2007-04-11 This book describes current advances and future directions in the theory and application of intelligent agents and multi agent systems in the Architecture, Engineering and Construction (AEC) sector. It is the product of an international effort involving a network of construction IT and computing researchers investigating different aspects of agent theory and applications. The contributed chapters cover different perspectives and application areas and represent significant efforts to harness emerging technologies such as intelligent agents and multi agent systems for improved business processes in the AEC sector. The first four chapters cover the theoretical foundations of agent technology whilst the remaining chapters deal with the application of agent based systems in solving problems in the construction domain.

Advanced Computing and Systems for Security Rituparna Chaki, Khalid Saeed, Agostino Cortesi, Nabendu Chaki, 2017-03-09 This book presents extended versions of papers originally presented and discussed at the 3rd International Doctoral Symposium on Applied Computation and Security Systems (ACSS 2016) held from August 12 to 14 2016 in Kolkata, India. The symposium was jointly organized by the AGH University of Science, Ca' Foscari University, Venice, Italy and the University of Calcutta, India.
