## **Australian Steel Institute Structural Connection Manual:**

**Handbook 1** T. J. Hogan, S. A. Munter, 2007 *Connections in Steel Structures III* Reidar Bjorhovde, André Colson, Riccardo Zandonini, 1996-05-20 This book publishes the proceedings from the Third International Workshop on Connections in Steel Structures Behaviour Strength and Design held in Trento Italy 29-31 May 1995. The workshop brought together the world's foremost experts in steel connections research, development, fabrication and design. The scope of the papers reflects state of the art issues in all areas of endeavour and manages to bring together the needs of researchers as well as designers and fabricators. Topics of particular importance include connections for composite steel concrete structures, evaluation methods and reliability issues for semi rigid connections and frames and the impact of extreme loading events such as those imposed by major earthquakes. The book highlights novel methods and applications in the field and ensures that designers and other members of the construction industry gain access to the new results and procedures. **Steel Designers' Handbook** Branko Gorenc, Ronald Tinyou, Arun Syam, 2005 This book makes extensive use of worked numerical examples to demonstrate the methods of calculating the capacities of structural elements. These examples have been extensively revised from the previous edition with further examples added. The worked examples are cross referenced to the relevant clauses in AS 4100 1998. **BOOK JACKET Design Guide 6** T. J. Hogan, S. A. Munter, Nicholas Van der Kreek, 2007 *Structural steel connections Bolts and bolting Tubular Structures XIII* Ben Young, 2010-11-12 *Tubular Structures XIII* contains the latest scientific and engineering developments in the field of tubular steel structures as presented at the 13th International Symposium on Tubular Structures ISTS13 Hong Kong 15-17 December 2010. The International Symposium on Tubular Structures ISTS has a longstanding reputation for being the principal showcase for manufactured tubing and the prime international forum for discussion of research developments and applications in this field. The Symposium presentations herein include one invited ISTS Kurobane Lecture together with all the technical papers. Various key and emerging subjects in the field of hollow structural sections are covered such as special applications and case studies, static and fatigue behaviour of connections, joints, concrete filled and composite tubular members and offshore structures, stainless steel and aluminium structures, earthquake and dynamic resistance, specification and standard developments, material properties and structural reliability, impact resistance and brittle fracture, fire resistance, casting and fabrication innovations. Research and development issues presented in this book are applicable to buildings, bridges, offshore structures, entertainment rides, cranes, towers and various mechanical and agricultural equipment. *Tubular Structures XIII* is thus a pertinent reference source for architects, civil and mechanical engineers, designers, steel fabricators and contractors, manufacturers of hollow sections or related construction products, trade associations involved with tubing, owners or developers of tubular structures, steel specification committees, academics and research students all around the world.
