Machine Learning for Business

Analytics Hemachandran K, Sayantan Khanra, Raul V. Rodriguez, Juan Jaramillo, 2022-07-21 Machine Learning is an integral tool in a business analyst's arsenal because the rate at which data is being generated from different sources is increasing and working on complex unstructured data is becoming inevitable. Data collection, data cleaning, and data mining are rapidly becoming more difficult to analyze than just importing information from a primary or secondary source. The machine learning model plays a crucial role in predicting the future performance and results of a company. In real-time data collection and data wrangling are the important steps in deploying the models. Analytics is a tool for visualizing and steering data and statistics. Business analysts can work with different datasets choosing an appropriate machine learning model results in accurate analyzing forecasting the future and making informed decisions. The global machine learning market was valued at 1.58 billion in 2017 and is expected to reach 20.83 billion in 2024 growing at a CAGR of 44.06% between 2017 and 2024.
