**The Business of Bioscience** Craig D.

Shimasaki,2009-09-18 My journey into this fascinating field of biotechnology started about 26 years ago at a small biotechnology company in South San Francisco called Genentech I was very fortunate to work for the company that begat the biotech industry during its formative years This experience established a solid foundation from which I could grow in both the science and business of biotechnology After my fourth year of working on Oyster Point Boulevard a close friend and colleague left Genentech to join a start up biotechnology company Later he approached me to leave and join him in of all places Oklahoma He persisted for at least a year before I seriously considered his proposal After listening to their plans the opportunity suddenly became more and more intriguing Finally I took the plunge and joined this entrepreneurial team in cofounding and growing a start up biotechnology company Making that fateful decision to leave the security of a larger company was extremely difficult but it turned out to be the beginning of an entrepreneurial career that forever changed how I viewed the biotechnology industry Since that time I have been fortunate to have cofounded two other biotechnology companies and even participated in taking one of them public During my career in these start ups I held a variety of positions from directing the science operations regulatory and marketing components to subsequently becoming CEO **Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2006: National Institutes of Health** United States. **Pharma Industry: Issues and Options**, 2001 **Best Practices in Biotechnology Business Development** Yali Friedman, 2008 The mainstream of today's biotechnology companies are small and medium sized companies Only 10 per cent of European biotechnology companies have more than 50 employees and over half employ less than 20 people Nearly 70 per cent of Swedish biotechnology companies employ fewer than 10 people 2 The fundamental origin of most biotechnology companies come from the academia in the form of spin off companies via Technology Transfer Offices Another source of biotechnology companies is science parks and business incubators where the goal of incubators is to decrease the chance that a start up will fail and shorten the time and reduce the cost of establishing and growing its business The present work by Yali Friedman is set out to bring together a set of best practices to be used as a framework upon which to understand critical issues in biotechnology business development Eleven chapters covering vital aspects of valuation licensing cash flow pharmacoconomics market selection communication and intellectual property IP rights seek to nurture the hungry minds of scientists business developers and bioentrepreneurs alike **LES Nouvelles**, 1996 *Information Industry Directory*, 2009 Comprehensive directory of databases as well as services involved in the production and distribution of information in electronic form There is a detailed subject index and function service classification as well as name keyword and geographical location indexes **China Report**, 1990 *Innovation and Commercialisation in the Biopharmaceutical Industry* Bruce Rasmussen, 2010-01-01 The processes of discovery testing and distribution of new medicines have undergone radical change in recent decades from a focus on small molecule drugs to biomedicine and related technologies Bruce Rasmussen very effectively draws upon modern theories of the firm data analysis and case studies to provide important insights into the consequences of this change He offers convincing evidence that contradicts the widely held view that the biopharmaceutical sector has not generated considerable economic value Frank R Lichtenberg Columbia University US Bio and pharmaceutical industry discovery is a distressed asset today Why Bruce Rasmussen's book is a timely and very informative work building on rich data sources and extensive economic research on a subject of concern to us all Is medicine discovery in permanent decline Are the biotechnology and traditional pharma groups on a collision course will the traditional group absorb the new will integration take place will a new discovery model emerge I commend Bruce's book to all who wish

to understand what is happening David W Anstice Merck Co Inc This path breaking book addresses the ongoing implications for traditional pharmaceutical companies and biopharmaceutical start ups of the realignment of the industry knowledge base The theoretical approach draws on the modern theory of the firm and related ideas in order to better define the concept of the business model which is employed to guide the case studies and empirical analysis in the book The author shows that while traditional pharmaceutical companies have successfully adjusted their business models to meet the challenges of biotechnology biopharmaceutical start ups have experienced more problems Despite the poor financial performance of the vast majority of these firms the biopharmaceutical sector as a whole has created significant value However this has been captured disproportionately by a handful of large fully integrated biopharmaceutical firms and to a lesser extent by the largest dozen pharmaceutical companies This highly focused book will be a captivating read for innovation and biopharmaceutical industry analysts as well as advisers formulating policies to support the development of the biopharmaceutical sector Academics working on innovation and biotechnology as well as scientists engaged in research in the life sciences will also find this book of particular interest
