**DATA MINING FOR BUSINESS INTELLIGENCE:** Galit Shmueli,Nitin R Patel,Peter C

Bruce,2008-09 Market\_Desc As a textbook or supplement for courses in data mining data warehousing business intelligence and or decision support systems at the upper undergraduate or beginning graduate MS Ph D or MBA levels in departments of mathematics and statistics computer science information technology engineering or business as a reference guide for professionals in related fields Special Features The book's greatest strength lies in its presentation of hands on business oriented applications complete with real data sets and cases The chapters have been written with flexibility in mind so the user and or instructor can navigate throughout the book as he or she chooses The excellent mix between mathematical rigor and readability make the book ideal for multiple readerships The software system of choice XLMinerTM is a familiar and easy to use tool for business analysts consultants and students since it is based on the popular Excel spreadsheet concept It provides a comprehensive set of data mining models and algorithms that includes statistical machine learning and database methods at no additional cost to the purchaser There are plentiful exercises and examples to motivate learning and understanding About The Book This book arose out of a data mining course at MIT's Sloan School of Management Preparation for the course revealed that there are a number of excellent books on the business context of data mining but their coverage of the statistical and machine learning algorithms and theoretical underpinnings is not sufficiently detailed to provide a practical guide for users who possess the raw skills and tools to analyze data This book is intended for the business student and practitioner of data mining techniques and the goal is threefold 1 to provide both a theoretical and practical

understanding of the key methods of classification prediction reduction and exploration that are at the heart of data mining 2 to provide a business decision making context for these methods and 3 using real business cases and data to illustrate the application and interpretation of these methods The book employs the use of an Excel add in XLMinerTM at no cost to registered instructors in order to illustrate and interpret the various data sets that are presented throughout Real life business cases are also presented so that readers can implement algorithms with a very low learning hurdle
